Puerto Rico
16th January – 21st January 2017

Ann and Andrew Duff
Report by Ann Duff

GENERAL INFORMATION

Our tour to Puerto Rico was booked with Julio Salgado Velez, a very enthusiastic young man who was recommended by Ian Merrill in his excellent January 2016 report. We e-mailed Julio a wish-list which included several tricky species as well as all the endemics. We did not visit the Fajardo/El Yunque area in the north-east as there were no new birds for us there. Julio worked out a six day itinerary taking our requests into account; five days would probably have been sufficient but we were linking this tour with Jamaica and Dominican Republic and had to accommodate flights etc. We can thoroughly recommend Julio who did all the driving as well as guiding; his knowledge of the birds and sites was excellent. His e-mail address is: juliosalgado@puertoricobirdingtrips.com

Included in our itinerary were: 5 night’s good quality accommodation, breakfasts, lunches and dinners, airport transfers, a comfortable air-conditioned vehicle and the services of an excellent guide, Julio Salgado. Our focus was on seeing all the endemics so the overall total number of birds seen was 117 species plus 2 heard only. Of the species seen 20 were new for us.

Flights We booked our flight with JetBlue from Kingston to San Juan via Fort Lauderdale - there being no direct flights from Kingston, Jamaica. We allowed five hours between flights in Fort Lauderdale in anticipation of lengthy queues at immigration - a wise precaution as there was heightened security after the recent shooting incident at the airport. Immigration took over an hour and then we had to transfer to Terminal 3, a short walk away. (Norwegian Air fly direct from London to Santo Domingo and are reasonably priced).

Visas & taxes An ESTA is currently required. There was no departure tax.

Transport in Puerto Rico Julio drove a comfortable Nissan SUV. Road conditions were good.

Accommodation We stayed two nights at TJ Ranch H C 4, Box14926, Arecibo; e-mail: tonyandjuanita@tjranch.com.
Three nights at La Villa Parguera, La Parguera; e-mail: hotel@villaparguerapr.com.

Food and drink Food was good with many local dishes such as tostadas, conch, maui-maui and mofongo.

Currency US dollar.

Health The usual inoculations are advisable but not compulsory. We encountered few biting insects; just a few mosquitoes.

Daylight hours UK is 4 hours ahead of Puerto Rico.

Weather Cloudy but mostly dry. As in Jamaica there had been a lot of rain and this had an impact on our chances of finding Yellow-breasted Crake as we were unable to access some of the sites.

**SUMMARY OF ITINERARY**

**DAILY DIARY**

Jan. 15th *Travel day* Left Kingston, Jamaica on 09:02 JetBlue flight for approx. two hour flight to Fort Lauderdale, USA. On arrival, queued for receipt from passport scanner; Andrew’s was OK, Ann’s had a cross which meant we had to join the long queue for an immigration officer, over an hour in total. Collected bag and walked short distance to Terminal 3; checked bag (no charge) to Santo Domingo. Joined another queue for the most promising of the eateries, a Tex-Mex restaurant. Flight left punctually at 16:00 arriving two hours later in Santo Domingo. No immigration thankfully! Taxi to nearby Coral by the Sea for overnight stay. N.B I had not padlocked our suitcase having had experience of cases being opened by the TSA; last time they wrecked the TSA approved padlock so I made it easy for them this time - and yes, it was opened with the usual disclaimer inside the case.

Jan. 16th We were waiting to be served breakfast when Julio arrived earlier than expected. Quickly checked out and headed west towards Arecibo, stopping briefly at the coast near Barceloneta for our first Magnificent Frigatebirds. Driving through Barceloneta towards Cambalache State Forest we saw a couple of Venezuelan Troupials, introduced from South America. The car park at the forest was very muddy but also very productive; PR Flycatcher, PR Woodpecker, PR Lizard-Cuckoo, PR Oriole, PR Vireo and the recently split Eastern Red-legged Thrush in just over an hour! We continued to a site near Arecibo airport where Julio hoped to find Yellow-breasted Crake, one of the three very difficult birds we’d asked him to add to the wish-list. Sadly there was no response so we carried on along the coast before stopping for lunch at Gustitos near Arecibo, highly recommended. Continuing on Interstate 10 we made a slight detour onto the scenic route for Utuado where Julio knew there were Adelaide’s Warblers and we were able to watch a pair at length. Next Julio had a real treat in store for us as we wound uphill through the back roads to his friend’s hummingbird garden. It was a joy to sit in the shade of the balcony and watch three species of hummingbird vie for position on the many feeders. PR Emerald, Green Mango and PR Mango provided much entertainment as we listened to our host, Pepe, telling us about his work on Puerto Rican Tody before showing us several of their nest holes dug in the roadside bank opposite his home. However, we had one more specific target this afternoon so we headed to Rio Abajo State Forest where we waited and waited. Although we added PR Tody, PR Pewee and PR Bullfinch to our life lists we only heard PR Parrots calling distantly. We were not so pleased to see a Small Indian Mongoose here; introduced to control rats in the sugar plantations they are now a menace to bird populations. We drove to the delightful TJ Ranch and settled into our lovely casita, before a huge dinner cooked by Tony. PR Screech-Owls could be heard around the property but the dense cover made them difficult to see. Julio had a different strategy so we drove slowly along the lane, looking and listening until we found one perched out in the open - brilliant! Eventually to bed to the sound of many tree frogs chirruping away.
Jan. 17th  Heavy rain overnight meant a change of plan - no early morning birding around the ranch but off to Rio Abajo straight after breakfast where we waited for the light rain to stop before walking as far as the gates to the aviary where the PR Parrot re-introduction breeding programme is based (Ian Merrill’s report gives a detailed account of this). Again we could hear the birds calling, only much closer. We decided to try the side track to the pylons described in Ian’s report but all we saw was a perched Broad-winged Hawk close to the track. The vegetation had grown so lush as to make it impossible to see very far into the forest so we returned to the main track. Andrew and Julio continued towards the gates while Ann lingered at the intersection. A flash of blue amongst the green caught her eye - feeding quietly in the canopy were two PR Parrots! Two more parrots flew in and as we watched them for the next 15-20 minutes we saw one of them was ringed. Jubilant we returned to the car and began our return journey to the ranch with a short stop where there should have been a large El Capitan tree, a big draw for PR Euphonias. Unfortunately the house had been renovated and the tree cut down but we stopped anyway and immediately heard euphonias calling. They were feeding in the run-down orchard on the opposite side of the road! Now we could return and enjoy a delicious lunch of pork tenderloin in a bun. With time to spare we had a welcome siesta before driving to the Lago dos Bocas for a few list padders and for Julio to catch up on his phone messages - reception is very poor at the ranch. There were several Ospreys, a Belted Kingfisher, Scaly-naped Pigeon and, on the way back, three Baltimore Orioles along with a couple of Venezuelan Troupials. Following an excellent meal of lamb chops followed by home-made passion fruit ice-cream we said good-bye to Tony, Juanita and their daughter as we would be leaving early next morning.

Jan. 18th  05:30 start in order to reach the Bosque Guilarte at first light; Julio had previously encountered another of our tricky species, Bicknell’s Thrush, at this high elevation damp forest. It was a dismal morning; cold, drizzly and misty. We slipped and slithered up the mossy, rock-strewn track only to be disappointed when there was no response; we had known it was a long-shot not that that helps very much! However, we did see Pearly-eyed Thrasher, PR Spindalis, Green Mango and Louisiana Waterthrush. We drove south towards Ponce stopping at Lago Numero Cinco, off Camino Cerrillo Hoyo, a large lake where we spent some time scoping the ducks, mainly Lesser Scaup with one possible Greater Scaup which caused a lot of discussion and led to Julio contacting friends in San Juan to come and take a look at it, the general consensus being that it was probably a hybrid. We added a few new species to the trip list including Ring-necked and Ruddy Ducks, Pied-billed Grebe, Tricoloured Heron and Yellow-rumped Warbler. After a brief spell of photographing the main sites in Ponce we continued to Combate and Cabo Rojo for lunch followed by a short exploration of the salt pans and mangrove on the road to the lighthouse adding Least Sandpiper, Semi-palmated Plover, Lesser Yellow-legs, Semi-palmed Sandpiper and Yellow Warbler. We were surprised at the low number of waders, having read of a wider variety and good numbers in other reports. A friend of Julio’s had suggested we try the nearby rice fields for Yellow-breasted Crake but once past the factory the ground became deeply rutted and then flooded so we had to turn back. Foiled again!

We checked in to our pleasant room overlooking the garden and mangroves at Villa La Parguera before a quick dinner and off out again to the edge of the Bosque Estatal de Guanica. It started to rain quite heavily causing concern that we might miss the PR Nightjar. Luck was on our side and as soon as the rain eased off we could hear the nightjar calling; it responded immediately and flew across the road before landing close by where we were able to see it clearly in the spotlight. Just as we were about to leave several other shapes flew by - a couple of night-herons with a Short-eared Owl following (chasing?) them.

Jan. 19th  A relatively late start and certainly a leisurely one; as far as the hotel jetty where we watched critically-endangered Yellow-shouldered Blackbirds fly from their roosting site to land in the mangroves next to the hotel. They were out-numbered by Shiny Cowbirds which are causing a big problem as they parasitise the blackbirds nests. After breakfast we headed for the hills and Maricao State Forest for one of my most-wanted birds, Elfin-woods Warbler. However we had reason to stop when Julio spotted an early arriving Caribbean Martin, a female, sitting on the telephone wires and preening. (On the way back she had been joined by a male). Once in the forest it was quite chilly in the shade at this higher elevation and we were glad of our fleeces; poor Julio felt it much more than
we did! We watched a range of Puerto Rican endemics, adding PR Tanager to our list and then after a short wait the warbler appeared and I was not disappointed. What is it about black and white birds that makes them so attractive? This dinky little warbler was incredibly hyper-active and a poor record shot was all that we achieved. So, all the endemics in the bag; time for some general birding and maybe even a bit of sightseeing. A quick climb to the top of the look-out tower built in the 1930s under a scheme set up by Franklin D Roosevelt to provide work for youngsters during the Depression provided the most amazing panoramic view. To the north was the Atlantic Ocean and to the south the Caribbean, taking in much of the western half of the island. After lunch and a siesta we drove to Laguna Cartegena for another attempt at Yellow-breasted Crake. The road down to the entrance of the Refuge was badly flooded and we could only just make it, driving slowly and carefully. The lagoon is becoming rather overgrown with encroaching vegetation and we spent a couple of hours searching without any luck. Ann had a fleeting glimpse of what might have been a crake but on such a poor view could not rule out Sora in spite of the size difference. However our time there was not wasted as we found several birds new for the trip list, the best being Blue-winged Teal, West Indian Whistling-Duck, Glossy Ibis, Killdeer, Wilson’s Snipe, Spotted Sandpiper, Caribbean Coot, Common Yellowthroat and a party of 10+ Indigo Buntings, including one very nice blue male. On the way back to La Parguera we tried the Hay farm where we found a Peregrine.

Jan. 20th After watching the Yellow-shouldered Blackbirds fly past again at our hotel we spent an enjoyable couple of hours birding at Cabo Rojo NWR along the Green Trail. It was a lovely sunny morning and we noticed lots of large Tree Iguanas perched out high in the tree canopy where they were warming up, starting off pale green and eventually becoming bright orangy-red by the time we left. Some were a metre or so long and with their large claws and spiky crests they looked quite fearsome. We did have one last difficult target with no expectation of seeing it - a Connecticut Warbler had been present here in December so why not try our luck. No warbler so we concentrated on photographing Adelaide’s Warbler, Venezuelan Troupial, Caribbean Elaenia, PR Woodpecker etc. We spent a bit of time in the very nice Visitor Centre where there were trail maps and bird lists - useful if you don’t have a guide. We returned to Laguna Cartegena for one last attempt for Yellow-breasted Crake but there was much less activity than yesterday with the only new species being Masked Duck. After lunch we tried to find some waders at the La Parguera salt-pan reserve - there was one Grey (Black-bellied) Plover! The Hay farm had one Killdeer and the same Peregrine as yesterday and the mangroves west of town produced a Yellow Warbler and a Clapper Rail. During a short excursion in to the heart of La Parguera and, in spite of the noise and crowds (it being Friday night with some sort of festival), we found a Northern Waterthrush on the edge of the mangrove close to the boat jetty.

Jan. 21st Our last day so after checking out of the hotel we began the drive west to Mayaguez, stopping briefly on the outskirts of La Parguera for a small flock of Indian Silverbills (a year tick for Julio!). The only new birds at Mayaguez were a Common Tern and a couple of Cabot’s Terns amongst the Royal Terns. Onward to Rincon where we watched a surfing competition while scanning for Brown and Red-footed Booby which were rather distant. North now and our final birding stop at Parc el Merendoro, Quebradilos, for White-tailed Tropicbird but no sign of the PR Harlequin butterfly Andrew had hoped to find there. On to the airport to check-in for our 16:40 JetBlue flight to Santo Domingo to join the Rockjumper tour of that part of Hispaniola. (And our bag was opened yet again by the TSA and a second disclaimer joined the first!)

**BIRDS**

E = Puerto Rican endemic; I = introduced; NE = near endemic; EN = endangered; V = vulnerable

**West Indian Whistling-Duck** *Dendrocygna arborea* - 1 on 19th at Laguna Cartegena

**Blue-winged Teal** *Anas discors* - c20 on 19th & 5 on 20th at Laguna Cartegena

**Ring-necked Duck** *Aythya collaris* - 5 on 18th at Lago Numero Cinco, nr Ponce

**Lesser Scaup** *Aythya affinis* - c100 on 18th at Lago Numero Cinco, nr Ponce

**Masked Duck** *Nomonyx dominicus* - 1 on 20th at Laguna Cartegena

**Ruddy Duck** *Oxyura jamaicensis* - 10 on 19th & 3 on 20th at Laguna Cartegena
Least Grebe *Tachybaptus dominicus* - 2 on 20th at Cabo Rojo NWR
Pied-billed Grebe *Podilymbus podiceps* - 6 on 18th at Lago Numero Cinco, nr Ponce; 1 on 19th at Lago Cartegena

White-tailed Tropicbird *Phaethon lepturus* - 1 on 21st at Parc el Merendoro
Magnificent Frigatebird *Fregata magnificens* - 3 on 16th near Barceloneta; 1 on 18th Cabo Rojo; on 21st 2 at Mayaguez, 1 at Rincon, 1 at Parc el Merendoro

Brown Booby *Sula leucogaster* - 4 on 21st at Rincon
Red-footed Booby *Sula sula* - 1 on 21st at Rincon
Brown Pelican *Pelecanus occidentalis* - seen most days
Great Blue Heron *Ardea herodias* - seen most days
Great Egret *Ardea alba* - daily
Snowy Egret *Egretta thula* - 1 on 18th Lago Numero Cinco, nr Ponce -
Little Blue Heron *Egretta caerulea* - 1 on 19th Villa la Parguera
Tricolored Heron *Egretta tricolor* - 1 on 18th Lago Numero Cinco, nr Ponce

Cattle Egret *Bubulcus ibis* - daily
Green Heron *Butorides virescens* - 1 on 18th Lago dos Bocas; 1 on 19th Laguna Cartegena; 3 on 20th Laguna Cartegena

Black-crowned Night-Heron *Nycticorax nycticorax* - 3 on 19th & 20th Laguna Cartegena
Glossy Ibis *Plegadis falcinellus* - 1 on 19th & 4 on 20th Laguna Cartegena
Turkey Vulture *Cathartes aura* - seen most days
Osprey *Pandion haliaetus* - 1 on 16th en route to Barceloneta; 3 on 17th Lago dos Bocas; 1 on 18th at Lago Numero Cinco, nr Ponce; 2 on 19th Laguna Cartegena

Sharp-shinned Hawk *Accipiter striatus* - pair on 19th maricao State Forest
Broad-winged Hawk *Buteo platypterus* - 2 seen & 2 heard on 17th Rio Abajo State Forest
Red-tailed Hawk *Buteo jamaicensis* - daily

Clapper Rail *Rallus crepitans* - 1 on 20th La Parguera Salt-pans Reserve
Sora *Porzana carolina* - 4+ on 19th & heard on 20th Laguna Cartegena
Purple Gallinule *Porphyrion martinicus* - 4 on 19th & 3 on 20th Laguna Cartegena

Common Gallinule *Gallinula galeata* - 2 on 18th Lago Numero Cinco, nr Ponce; 5+ 19th & 20th Laguna Cartegena

American Coot *Fulica americana* - 15+ on 18th Lago Numero Cinco, nr Ponce; 2 on 19th & 20th Laguna Cartegena

Black-bellied Plover *Pluvianus squatarola* - 1 on 20th La Parguera Salt-pans Reserve
Semipalmated Plover *Charadrius semipalmatus* - 3 Arecibo beach

Killdeer *Charadrius vociferus* - 2 on 19th Laguna Cartegena; on 20th 1 Cabo Rojo NWR; 1 Hay farm, Cabo Rojo

Least Sandpiper *Calidris minutilla* - c30 18th Cabo rojo salt pans
Semipalmated Sandpiper *Calidris pusilla* - 2 on 18th Cabo Rojo salt pans

Wilson’s Snipe *Gallinago delicata* - 1 on 19th Laguna Cartegena; 1 on 20th Cabo Rojo NWR

Spotted Sandpiper *Actitis macularius* - 1 on 19th Laguna Cartegena
Lesser Yellowlegs *Tringa flavipes* - 2 on 18th Cabo Rojo salt pans

Common Tern *Sterna hirundo* - 4 on 16th Pepe’s hummingbird garden, Arecibo; 1 on 19th Villa la Parguera

Puerto Rican Mango *Anthracothorax aurulentus* - 1 on 16th Pepe’s hummingbird garden, Arecibo; 1 on 19th Villa la Parguera
Puerto Rican Bullfinch *Loxigilla portoricensis E* - 3 on 16th Villa La Parguera hotel

Puerto Rican Emerald * Chlorostilbon maugaeus E* - 2 on 16th Pepe’s hummingbird garden, Arecibo; 2 on 18th Bosque Guílar te

Puerto Rican Tody * Todus mexicanus E - seen most days

Belted Kingfisher * Megaceryle alcyon * - 1 on 16th Puerto Arecibo; 1 on 17th Lago dos Bocas

Puerto Rican Woodpecker * Melanerpes portoricensis E* - seen or heard most days

American Kestrel * Falco sparverius * - 1 on 17th near TJ Ranch; c6 on 18th en route to La Parguera

Peregrine Falcon * Falco peregrinus * - 1 on 19th & 1 on 20th rice fields near La Parguera

Monk Parakeet * Myiopsitta monachus Int * - 2 on 16th en route to Arecibo

White-winged Parakeet * Brotogeris versicolorus Int * - 2 on 16th en route to TJ Ranch

Puerto Rican Parrot * Amazona vittata E* - heard on 16th & 4 seen on 17th Rio Abajo State Forest

Caribbean Elaenia * Elaenia martinica NE * - 3 on 20th Cabo Rojo NWR

Lesser Antillean Pewee * Contopus latirostris NE * - 1 on 16th Cambalache State Forest; 1 on 17th Rio Abajo State Forest; 2 on 17th TJ Ranch

Puerto Rican Flycatcher * Myiarchus antillarum E* - 2 on 16th Cambalache State Forest; 1 on 20th Cabo Rojo NWR

Gray Kingbird * Tyrannus dominicensis* - common

Loggerhead Kingbird * Tyrannus caudifasciatus NE * - 1 on 17th between TJ Ranch & Lago dos Bocas

Puerto Rican Vireo * Vireo latimeri E* - 2 on 16th on Cambalache State Forest

Black-whiskered Vireo * Vireo altiloquus * - heard on 17th Rio Abajo

Caribbean Martin * Progne dominicensis NE * - 2 on 19th en route to Maricao State Forest

Bank Swallow * Riparia riparia * - 1 on 18th Cabo Rojo; 1 on 20th Laguna Cartagena

Barn Swallow * Hirundo rustica * - c20 on 18th over the rice fields near La Parguera; 100+Laguna Cartagena

Cave Swallow * Petrochelidon fulva * - 3 on 16th La Rosera, nr Arecibo; 10 on 20th Laguna Cartagena; 5+ on 21st Parc el Merendoro, Quebradillos

Eastern Red-legged Thrush * Turdus ardosiaceus NE * - seen daily

Pearly-eyed Thrasher * Margarops fuscatus * - 1 on 16th Cambalache State Forest; 1 on 18th Bosque Guílar te; 1 on 19th Maricao State Forest

Northern Mockingbird * Mimus polyglottos - common

Louisiana Waterthrush * Parkesia motacilla * - 1 on 18th Bosque Guílar te

Northern Waterthrush * Parkesia noveboracensis * - 1 on 20th La Parguera

Common Yellowthroat * Geothlypis trichos * - 2 on 19th Laguna Cartagena

Elfin-woods Warbler * Setophaga angulata E V * - 3 on 19th Maricao State Forest

American Redstart * Setophaga ruticilla * - 1 on 16th Rio Abajo State Forest

Northern Parula * Setophaga americana * - 1 on 17th Rio Abajo State Forest; 1 on 20th Cabo Rojo NWR

Yellow Warbler * Setophaga petechia * - 1 on 18th & 1 on 20th La Parguera mangroves

Black-throated Blue Warbler * Setophaga caerulescens * - 1 on 16th Cambalache State Forest; 1 on 18th Camino Foreman nr. Adjuntas; 1 on 19th Maricao State Forest

Palm Warbler * Setophaga palmarum * - 1 on 18th rice fields near La Parguera

Yellow-rumped Warbler * Setophaga coronata * - 1 on 18th Lago Numero Cinco, nr Ponce

Pine Warbler * Setophaga discolor * - 3 on 20th Cabo Rojo NWR; 1 on 21st Parc el Merendoro

Adelaide’s Warbler * Setophaga adelaidae E * - 2 on 16th road to Utuado; 4+ on 20th Cabo Rojo NWR

Bananaquit * Coereba flaveola * - common

Yellow-faced Grassquit * Tiaris olivaceus * - 1 on 20th Cabo Rojo NWR

Black-faced Grassquit * Tiaris bicolor * - 2 on 17th TJ Ranch; 2 on 18th rice fields nr. La Parguera; 2 on 20th Cabo Rojo NWR

Puerto Rican Bullfinch * Loxigilla portoricensis E* - 3 on 16th Rio Abajo State Forest; 2 on 19th Maricao State Forest

Puerto Rican Tanager * Nesospingus speculiferus E* - 2 on 19th Maricao State Forest

Puerto Rican Spindalis * Spindalis portoricensis E* - heard on 17th Rio Abajo State Forest; 4 on 18th Camino Foreman, nr Adjuntas; 1 on 19th Maricao State Forest

Indigo Bunting * Passerina cyanea * - 2 on 19th en route to Maricao State Forest

Yellow-shouldered Blackbird * Agelaius xanthomus E EN * - c30 on 19th; 6 on 20th; c15 on 21st all at Villa La Parguera hotel

Greater Antillean Grackle * Quiscalus niger * - daily

Shiny Cowbird * Molothrus bonariensis * - 1 on 16th Cambalache State Forest; 19th; 20th; 21st all at Villa La Parguera hotel

Puerto Rican Oriole * Icterus portoricensis E* - 16th Cambalache State Forest

Venezuelan Troupial * Icterus icterus Int * - 2 on 16th nr. Barceloneta; 2 on 17th nr. TJ Ranch; 4 on 20th Cabo Rojo NWR

Baltimore Oriole * Icterus galbula * - 3 on 17th nr. TJ Ranch

Antillean Euphonia * Euphonia musica * - 3+ en route from Rio Abajo State Forest to TJ Ranch

House Sparrow * Passer domesticus - most days
Northern Red Bishop *Euplectes franciscanus* **Int** 2 on 20th Cabo Rojo NWR
Orange-cheeked Waxbill *Estrilda melpoda* **Int** 4 on 17th nr. TJ Ranch; c10 on 18th 19th rice fields nr. La Parguera; 6 on 20th 19th rice fields nr. La Parguera
Bronze Mannikin *Spermestes cucullata* **Int** 6+ nr. Arecibo; 4+ TJ Ranch; 8 on 19th rice fields nr. La Parguera
Indian Silverbill *Euodice malabarica* **Int** 5 on 21st nr. La Parguera
Scaly-breasted Munia *Lonchura punctulata* **Int** c30 on 18th rice fields nr. La Parguera

**MAMMALS**
Small Asian Mongoose *Herpestes javanicus* - 1 on 16th Rio Abajo State Fprest

**BUTTERFLIES**

Lyside Sulphur *Kricogonia lyside* - Cabo Rojo gas station, several around one tree
Barred Yellow *Eurema daira palmira* - Cabo Rojo NWR
Little Yellow *Pyrisitia lisa euterpe* - Cabo Rojo NWR
Great Southern White *Ascia monuste* - Cabo Rojo NWR
Queen *Danaus gilippus cleothera* - Cabo Rojo NWR. Apparently a rare species in Puerto Rico.
Julia *Dryas iulia iulia*
Zebra Longwing *Heliconius charithonia*
Antillean Sister *Adelpha gelania arecosa* - TJ Ranch
Caribbean Cracker *Hamadryas amphichloe diasia* - Cabo Rojo mangroves
White Peacock *Anartia jatrophae* - TJ Ranch
Malachite *Siproeta stelenes*
Tropical Buckeye *Junonia evarete michaelisi* - Cabo Rojo NWR
Puerto Rican Calisto *Calisto nubila* - Camino Foreman
Long-tailed Skipper *Urbanus proteus domingo* - Cabo Rojo NWR
Tropical Checkered-skipper *Pyrgus oileus* - TJ Ranch
Three-spotted Skipper *Cymaenes tripunctus* - Cabo Rojo NWR
Vitellius Skipper *Choranthius vitellius* - Lago Numero Cinco, nr Ponce

Little Blue Heron
Purple Gallinule
Royal Tern
Sandwich (Cabot's) Tern
Scaly-naped Pigeon

Zenaida Dove

Puerto Rican Screech-Owl

Green Mango

Puerto Rican Tody

Puerto Rican Woodpecker
Puerto Rican Bullfinch

Greater Antillean Grackle

Caribbean Cracker

Tropical Buckeye

Puerto Rican Calisto

Tropical Checkered-skipper

Vitellius Skipper
