ER 205 Birds in Gambia (2)

I made this birdwatchingtrip as a tourleader of the dutch travel agency Birdingbreaks. We flew with Corendon from Amsterdam to Banjul (Serekunda). The group had 5 participants. During our stay we travelled with our own bus and were accompanied most of the time by the excellent local guide Modou Jarju.

Short description of the visited areas :

- **Serekunda :** 4 nights were spent in the excellent Senegambia Beach Hotel. Many birds can be seen in the garden of the hotel. Nearby Kotu Bridge and surroudings were visited twice.
- **Brufut Woods :** small woodland south of Serekunda. We birded the northern border of the forest and visited a birdhide.
- **Tanji area :** we had lunch in the Tanji Bird Reserve, just north of Tanji village. Several birds were seen in the area, even close by on a feeding station next to the restaurant. After lunch a short visit was paid to the lagoon and bridge near Tanji fishing village.
- **Tujering :** south of Tanji we visited a coastal area close to Tujering. It is an open area with bushes, small trees and some Baobab trees..
- **Farasuto forest area :** this inland area consists of a piece of closed forest and a more open area. Famous is the nearby Mr Ba's hide. We had lunch on Baobab island, a real island surrounded by mangroves. It is only accessable by a short boatride crossing the creek.
- **Kartong area :** after a 1,5 hour ride from Serekunda we reached the Kartong marshes, manmade by digging humans. Now it is a very nice area for birders with many waterbirds. A short hike was made in the surrounding dry savannah and deserted fields. We had lunch along the Allehein river, the border with Senegal. After lunch we made a nice boatride on the river.
- **Gunjur Forest :** north of Kartong is a beautiful although threathend forest remnant (44 ha). We visited this area in the afternoon. Some time was spent in a birdhide next to a small pool. Several interesting species were seen.
- **Marakissa area :** we stayed two nights in the Marakissa river camp. The surroudings of this pleasant accomodation next to a small river were explored on foot several times. Next to the camp West African Crocodiles can be seen easily.
- **Pirang Shrimp Farms :** after breakfast in Marakisse RC we made a nice circular walk along several (former) shrimp farms. This area is not far east of the airport and is especially good for waders.
- **Sotokoi :** near Sotokoi we briefly visited an area south of the main road near Farababandono. We had lunch in Lodge Jamorel north of the main road. Several birds were seen in the vegetation and open area next to the lodge.
- **Kampanti :** a nice birding location just north of the main road is called Raptor Bridge. A short stop was made here on our way to Tendaba. The area has a spring with sweet water. It is especially attracts to many raptorspecies.
- **Tendaba :** small village at the southern shore of the big Gambia river. Next to the village is a tourist camp with restaurant and accomodation. We stayed two nights and did of course the beautiful excursion on the other side of the river into the Bao Bolong Wetland Reserve (220 km²). The surrouding dry forest south of Tendaba was explored also.
- **Soma :** a few waterbirds were seen in the wetlandareas around this small town.
- **Farafenni area :** small town north of the Gambia river, just after crossing the now 8 years old bridge. The wetland area east of town was checked for birds. Further east some fields were checked for coursers and bustards near Mbapa Marika.
- **Kaur area :** we stayed 1 night in an lodge on an hill near Kaur. One can overlook the Gambia river valley very nicely from here. Some interesting birdspecies come to the feeders next to the restaurant. In the area one can see remnants of lakes formed during de rainy season.
- **Njau area :** further east on the northbank of the Gambia river we had two brief stops in the area of Njau.
- **Janjanbureh (Georgetown) :** we stayed in the Sensending Lodge on the north bank of the Gambia river, just opposite of the centre. From here the surrouding area was explored and a boatride was made on the river. The area around Wassu was visited when we came from Kaur. Some birds were seen on the south bank near Bansang.
- **Basse Santa Su :** during a morning visit to this eastern town short and succesful boatride was made to see the Egyptian Plover.
- **Kudang area :** northeast of Kudang, south of the Gambia river, a dirtroad gives access to a swamp.
- **Dalaba Lakes :** on our way back to the coast a short lunchstop was made just east of Dalaba. One can find several small lakes here north of the road.
- **Kassagne area :** we stayed three nights in the excellent Abca's Creek Lodge, with good views over a bordering mangrove stream. Many birds can be seen in the area. Unfortunately the surrouding forest is under pressure of human encroachment. A morning visit was paid to the nearby Albert Mandy Fotohut. This birding area is ubicated just south of to the main road. It is an interesting area for several birdspecies difficult to see elsewhere. A small piece of land is protected from cutting wood here.
