Zambia & Zimbabwe

20th November – 5th December
2021

By Jon Lehmberg
Introduction

While many countries in Eastern and Southern Africa are understandably extremely popular among birders, both Zimbabwe and in particular Zambia are much less well-known destinations. Somehow it doesn’t seem quite right since both have so much to offer, but maybe it isn’t surprising that most birders tend to follow in the footsteps of others, and are going for the more famous destinations in the region. A lack of knowledge and tourist infrastructure in some places might also hold back some from going, and some sites can be pretty expensive to visit as well.

However, the emergence of Zambia as one of the best, if not the best, country for seeing African Pitta could be a game changer. Add to that the chance of two attractive Zambian endemics, a good selection of otherwise range restricted species and just generally good birding, some really lovely national parks and reserves, the magnificent Victoria Falls, and some very good mammal watching opportunities, including the amazing fruit bat spectacle in Kasanka NP, and you have all the ingredients for a highly desirable trip.

The very real possibility of finding the pitta, and even seeing it well, was no doubt the primary catalyst for our trip to Zambia, since we knew preciously little about what else the country had to offer. The lack of prior knowledge, and the fact that we only had a relatively short time to do all the planning and arrangements, made for a rather hectic couple of months leading up to our departure. The fact that quite a few of the local operators were annoyingly slow to respond to our inquiries, or didn’t answer at all, during the process made it even more stressful. We had expected the tourist industry in both Zambia and Zimbabwe to be desperate to welcome back foreign visitors, after having suffered enormously during the world-wide Covid pandemic, and it took us by surprise when that only partly seemed to be true. Of course, the lingering pandemic was a major concern for us while planning and executing the trip, and with good reason it turned out. The Covid related restrictions had been lifted almost entirely in Denmark when we started planning, and because we had been grounded by them for so long, we were happy to finally have the chance to travel again. Since we were all fully vaccinated, we didn’t really have any health concerns either, but since we had to be tested before departure, and every time we crossed a border, we knew in advance that there would be risks of quarantine involved with this trip. Luckily, we all tested negative on the four occasions when we were tested, but unfortunately the virus caught up with us in the end anyway. The emergence of the new Omicron variant in South Africa happened when we were approximately halfway through our tour, and even if we were desperate to continue, we were eventually forced to drop the last week and return home prematurely when Emirates cancelled all flights to Southern Africa. It also meant that we had to find alternative ways of getting home, and luckily Ethiopian Airlines were there to help us out. Unfortunately cancelling the last week also meant cancelling the all-important pitta-part of the trip and more. This was of course a major disappointment for us and meant that the trip ended on a bit of a sour note! Still, we never regretted going and really enjoyed our time in the two countries. We might well be back in the future and can only recommend others to do the same.

If you have any questions regarding the report, please feel free to contact us on: jon.lehmberg@gmail.com.

Planning and logistics

Usually when travelling abroad we make all the arrangements ourselves, except for the odd occasion when using a local agent makes more sense. As soon as the itinerary for this trip started to take shape, though, it became clear that it would have to be a combination of the two this time around. We fairly quickly realised that we’d be focusing on 4 main areas of which one, Hwange National Park, would be in Zimbabwe, and the other three in Zambia, namely The Zambezi River southeast of Lusaka for the pitta, the southcentral area between Lusaka and Livingstone (Lochinvar NP, Nkanga RCA, Machile IBA etc.) for the two endemics, and the northern circuit (Kasanka NP, Mutinondo Wilderness etc.)

Those of us with an extensive knowledge of African affairs were adamant that going to Zimbabwe on our own was ill-advised, which meant that a local operator was needed there. Luckily there’s no shortage of local agents in that part of the country. We were equally sure that it made the most sense doing the northern circuit in Zambia on our own. It was our initial plan to do the remaining two areas on our own as well, though we would have needed a local guide for the Machile IBA had we not gone for the lovebirds in southern Kafue NP instead. However, for various reasons, running out of time not being the least, we eventually decided to let a local company do this part of the trip for us.

Airline Tickets: As usual, we found our flights, both international and domestic, online, using Momondo and purchasing them through Travellink. The Covid pandemic didn’t seem to affect the number of flights to choose from much, but the prices were probably a little higher than they would otherwise have been. We ended up each paying approximately 942 Euros for the international flight and 140 Euros for the one-way trip from Livingstone to Lusaka. We didn’t need
much time to weigh our options when it came to the domestic flight, since Proflight Zambia was the only company offering nonstop flights, and they only made one each day. The international flight was another matter with three international airports, Victoria Falls, Livingstone and Lusaka, to choose from, but the fastest option was Emirates one stop flight to Lusaka. It wasn’t the cheapest, and the stopover in Dubai on the way out was an all-nighter, but since it gave us the most time in Africa, we took it anyway. We also reckoned that Emirates would be one of the more likely companies to offer good assistance in case of a Covid-related cancellation, but as it turned out they weren’t. Just the opposite actually, since they were the first to cancel flights to Zambia, offered no help at all when we had to rebook, and took no direct responsibility when it came to the refund. We had to apply through Travellink, and now, more than three months later, the matter still hasn’t been settled! While Emirates was a major disappointment for us, Ethiopian Airlines was the exact opposite. When Emirates, and others, went straight into hysteria mode, they maintained normal services, thus providing us with a way out of Africa. Not only did they keep flying, they did it without taking advantage by cranking up the prices, which meant that we each paid somewhere between 600 and 650 Euros (we booked separately) for the flight home. Our only concern regarding the Ethiopian Airlines flight was that it included a stopover in Addis Ababa, which at the time was on the frontline of the civil war. It was our assessment, however, that as long as the international airport was open for business, it would be okay, and luckily that turned out to be the case.

Visa: As Danish citizens we needed visas for both Zambia and Zimbabwe, but luckily, we qualified for the KAZA UniVisa which can be bought on arrival and is valid for both countries for 30 days. The price is a reasonable $50 and it’s good for an unlimited number of border crossings. Please remember that your passport needs to be valid for 6 months after your departure date, though.

Money: In Zambia the local currency is called Kwacha and in Lusaka they are easily obtainable from ATMs at malls and banks. We suspected that it would be more difficult once we ventured into the countryside, so we stocked up on local currency before leaving the capital. Zimbabwe is a different matter altogether when it comes to local currency. Though only some 42 years old, the history of the Zimbabwean Dollar is long and troubled, and our best advice is to forget about it and bring US Dollars instead. It wasn’t much of an issue for us, though, since just about everything was bought and paid for in advance.

Car hire: Of the international companies only Europcar and Avis have branches in Lusaka, and since we decided to go for a 4X4 for our trip north from the capital, Avis didn’t have anything to offer. Since the office of Europcar would be closed when we flew in from Livingstone, and since they offered only limited milage, we decided to try a local company instead. It was difficult to find reviews of the ones we found online, but Chaliko Car Hire were quick to respond to our inquiry. They seemed very service minded too, offering free milage, pick up and drop off at the airport free of charge outside office hours, no extra charge for insurance and multiple drivers, and a price which was considerably lower than Europcar, but not suspiciously so. We’d love to say that it turned out to be a good choice, but sadly it wasn’t. It started just fine with them turning up at the airport as promised, but from then on it all went downhill. The Mitsubishi Pajero we got was pretty old and banged up, including a cracked windshield which cost us a fine at one of the police check points. The next morning when we were leaving Troy Lodge, there was a distinct smell of petrol at the carpark, but we weren’t sure it was from our car, and couldn’t see it leaking. Of course, we should have asked for another vehicle at that point, but we were anxious to get out of town early to be sure to reach Kasanka NP in time. The trip north actually went well, with no sign of the car leaking petrol, and we had no additional car trouble until we reached the national park. On the way from the main road to Wasa Lodge we stopped to look at the first Kinda Baboons but when we wanted to proceed, the car wouldn’t start. Luckily it just turned out to be one of the battery cables which wasn’t fastened properly, and we were soon on our way again. We didn’t use the car while staying at Wasa Lodge, but just to make sure it was still okay, we tried starting it in the afternoon on the day prior to our departure from the lodge. We now knew that it was actually “our” car smelling of petrol, and as it turned out, the fuel gauge now showed an empty tank. That wasn’t good news, of course, but we reckoned that the leak had to be tiny and luckily the lodge agreed to sell us 50 litres of petrol. After our final game drive the next morning, they started filing the car, but it soon turned out that it wasn’t empty after all. The car kept showing an empty tank, though, even now that it was completely full, and it wouldn’t start. The staff at the lodge tried everything they could to help us, and actually succeeded in getting the car started, but only for it to stop again after driving very short distances. The problem turned out to be the fuel line, and to their credit, Chaliko offered to send a driver with a replacement car even if it was more than a 500 kilometre drive. However, we didn’t have time for that since it was now almost noon, and we informed them that we were going to leave the car at the lodge. Instead, we had to pay through the nose for
the lodge to give us a lift to Lusaka, but we were glad to at least be heading in the right direction. Our joy didn't last for long though. About an hour after leaving the lodge, the car taking us to the capital broke down as well, but that's a story for another time.

Perhaps a 4x4 isn't strictly necessary when visiting Kasanka NP and Mutinondo in the dry season, but we wanted to be sure not to get into trouble, and this was after all the beginning of the rainy season. We still think it's the safe choice in any season, but next time we'll use another company for sure. It's difficult to say if we were just extremely unlucky, but there's no denying that the car we got was simply not okay!

There are a number of companies specialised in 4x4 rental in the other Southern African countries, most of these based in South Africa of course. We received an offer from Bushlore - https://bushlore.com/ - which was actually quite fair, but unfortunately, they wanted us to collect and return the car in Kasane, Botswana. That would have meant altering our itinerary completely which wasn't possible at the time.

Driving in Zambia was fairly easy even if it was on the wrong side of the road, compared to what we're used to. People here are generally relaxed and traffic isn't too bad, though there's quite a lot of heavy traffic on the main roads like the Tan-Zam Highway (T2). The tarred roads we used were mostly in a decent state, with the notable exception of the last part of the M10 from Livingstone to Machile, and gravel and dirt roads were also usually pretty good. It's worth noting, though, that conditions can change dramatically during heavy rain, and as usual we recommend only driving during the day, since driving in the dark can be something of an ordeal in this part of the World. Also, we'd like to offer a final word of caution regarding petrol stations which can be few and far apart in some areas. It's therefore a good idea to check the location of these beforehand when visiting more remote areas.

**Accommodation:** Since the first and last part of the trip was organised for us by local agents, we only had to book accommodation ourselves on the northern circuit. In Lusaka we stayed at Troy Lodge for one night twice, and made the booking online through [www.booking.com](http://www.booking.com). The lodge offers check in and check out at any time, it's reasonably priced, and the rooms are rather small but perfectly adequate. It was nice and clean in general, but while some rooms
had clearly recently had a makeover, other were obviously in need of one. Breakfast was okay and they made us an excellent packed breakfast/lunch on the day when we had to leave early for Kasanka NP. Though the lodge is conveniently situated just off the T4 leading from downtown Lusaka to the international airport and further east, it’s in a quiet neighborhood and we can easily recommend it.

While there were a lot of options in Lusaka, the choice of accommodation pretty much gave itself In Kasanka NP and the Mutinondo Wilderness area. The chalets at Mutinondo Wilderness Lodge can be booked online, but we made our bookings both there (info@mutinondozambia.com), and at Wasa Lodge in Kasanka NP (internationalres@kasanka.com), by e-mail. They both offer full board and a range of activities for a fair price, we think, and while we sadly never made it to Mutinondo, Wasa Lodge at least was very nice. We also had a single night at The Forest Inn on our northern itinerary, but we reluctantly had to cancel our stay there as well. We made our booking at the inn by e-mail (forestinnzambia@gmail.co), and they charge 1120 Kwacha (approximately 55 Euros) a night for a twin room, breakfast included.

For travelers, confident enough to try finding African Pitta along The Zambezi River on their own, Gwabi River Lodge - www.gwabiriverlodge.com - seems to be a good choice of accommodation, even if there are other nice options in the area around the confluence of the Zambezi and Kafue Rivers. On our trip south from Lusaka to Livingstone, organised by Birding Zambia, we stayed at the following places: Pioneer Camp (Lusaka), Moorings Camp (2 nights near Lochinvar NP), Le Gite (Nkanga RCA), Thorn Tree House (Livingstone) and Nampene Island (west of Livingstone). They can all be found online, and can all be booked either directly or via booking sites like Airbnb or Booking.com. The same goes for Robins Camp in Hwange NP - www.robinscamp.com.

Local agents: As mentioned above, we were never in doubt that the Zimbabwean part of the trip should be handled by a local agency, and even if there are quite a few to choose from, we wanted someone with good local knowledge and quickly zeroed in on DK Tours & Safaris - http://dktoursandsafaris.co.zw/#. They are a company based in Victoria Falls and just about every review we read regarding them was positive. We were impressed by our contact, Webster Musaidzi, from the get-go, since he was very quick to respond to all our inquiries and always eager to assist. All arrangements from the safari itself, to the Covid testing in Victoria Falls, to getting us back across the border, and on to the airport in Livingstone, went without a hitch. We each paid approximately 1370 Euros for our 4 nights stay in Robins Camp, including just about everything from we were picked up at the border till we were dropped off at the airport in Livingstone. Not exactly cheap for sure, but safaris rarely are, and it compared rather favourably to all the other optioned we looked at here. It was of course a major let down that we missed both of our mammal targets here, but never the less we warmly recommend DK Tours and Safaris to anyone visiting this part of Zimbabwe!

Using a local agency in Zambia was much more of a contested topic, but once we decided to do so, there was only ever one choice. Birding Zambia - https://www.birdingzambia.com/ - is a fairly new company and our first contact there was the Dutch born cofounder Frank Willems. Communication was frustratingly slow in the beginning since Frank was in the field most of the time, but it got much better when his wife, Inge Akerboom, joined in. They made an itinerary for both the southcentral (6 nights) and pitta (3 nights) part of our trip, and it looked good so we accepted. We each paid approximately 2920 Euros for the two trips combined, and even if the price was all inclusive, there’s no denying that we found it very high indeed! Maybe that’s just the going rate in this part of the World, but there’s no doubt that we could have done it much cheaper ourselves. On the up-side we felt good that some of the proceeds goes to support BirdWatch Zambia - https://www.birdlife.org/partners/zambia-birdwatch-zambia/, and to be fair, we got most of our money from the cancelled pitta-tour back without any kind of trouble, even though they weren’t actually obligated to do so according to the small print. However, the biggest up-side was no doubt our guide Wouter van Spijker - https://www.facebook.com/wvspijkerbirding/, who was simply outstanding. Wouter guided us on the southcentral part of the trip because Frank was busy elsewhere, but we didn’t feel short-changed by that at all. From the moment he picked us up in Lusaka till he dropped us off at the border in his hometown Livingstone 7 days later, Wouter was an excellent guide both on a professional and personal level, and we simply can’t say enough good things about him. Needless to say, that we can recommend him as a guide without hesitation, and it might be possible to contact him directly if you need a guide in the area - see contact information in the link above.

Timing and weather

Sometimes the place you want to visit dictates the timing of the trip, and sometimes it’s the other way around. In this case it was a perfect fit, since our rather limited shared window of opportunity coincided perfectly with the best time
to find the elusive African Pitta, which was our undisputed main target on this trip. The pittas are most easily found
at the beginning of the rainy season when they return to their breeding sites and are singing/displaying most actively,
which is crucial in finding such an otherwise skulky species.
In Zambia the rainy season usually starts sometimes during the second half of November which makes the first weeks
of December probably the best time to search for pittas. Luckily, we were all able to escape the winter darkness of
Denmark, for three weeks by the end of November and beginning of December. To optimise out chances with the
pittas, we decided to concentrate our efforts with that particular species towards the end of our trip, which should
be just about the perfect time for it. The rest of the itinerary was to some extent dictated by availability, since
Wasa Lodge in Kasanka NP was fully booked in November. Our initial plan had been to go there first in order to see
the spectacular gathering of fruit bats, which was also very high on our wish list. As it turned out, it didn’t really
matter much since they were still around in full numbers when we arrived on the first day of December.
As expected there had already been a bit of rain in both countries prior to our arrival on 20th November, but nothing
serious yet, and luckily heavy rain wasn’t going to be a problem for us in the following weeks either. Though there were
some showers about in the first few days, we were only directly affected by them, on a couple of occasions. The first
was in Moorings Camp where a proper thunderstorm rolled through the camp in the evening, and the second was in
Nkanga RCA where we had to make a short dash for the car, when we were caught out by a short but heavy shower
with hail and thunder. In general, the first few days were partly clouded, or even overcast at times, with pleasant
temperatures and no wind to speak of. After that the skies cleared and the rest of the trip was mostly sunny with no
rain at all, and maximum daytime temperatures typically around 30 degrees Celsius. Quite pleasant really since
humidity was not yet high except around Victoria Falls. Wind continued to be light throughout, except in Hwange NP
where the first couple of full days were surprisingly windy in the middle of the day.

Pests, health and safety.

Regarding pests, there wasn’t much to speak of, really. Mosquitoes were almost absent, except for our one-night stay
at Nampene Island, where there were plenty around at dusk in particular. Other areas along the Zambezi River are
also known for a healthy population of these little buggers, but sadly we were denied the chance to check it out for
ourselves. The low number of mosquitoes meant that the risk of getting malaria was rather limited during our stay.
However, we still took our malaria prophylaxis once daily from a “better safe than sorry” perspective.
Another nasty little fellow often encountered in Africa is the tsetse fly, and Kasanka is a well-known place for them.
Luckily, we only had a single brief encounter with them there and even then, they seemed uncharacteristically docile,
hence none of us were actually bitten. We didn’t encounter any other health issues during our trip either, not even the
odd upset stomach, even if we drank tap water from boreholes occasionally, and ate fresh vegetables whenever it was
served. The food by the way was generally excellent.
The major health concern for this particular trip was the still raging Covid pandemic, but it was never much of a worry
for us. Only the testing required to cross borders was a concern, but luckily all tests were negative. It meant that we
were never really affected by the pandemic except towards the end when the hysteria surrounding the new Omicron
variant put an abrupt and premature end to our vacation.
Some will no doubt consider snakes, spiders and scorpions pests as well, and they are of course around. We had no
problems with either, though, and were actually a little sad to only find a couple of unidentified snakes in Moorings
Camp, and a single scorpion in both Pioneer Camp and on Nampene Island. Spiders were more numerous, and we were
also lucky to find solifugids, affectionately called “Kalahari Ferraris”, on a few occasions. They are quite big and very
fast, but not true spiders since they lack both venom glands and spinnerets.
Much more of a pest was the many speed traps and police checkpoints along the T2 Highway, combined with a lack of
signs - be particularly aware around toll booths and villages. One positive was that we were able to negotiate our
speeding fines to about a third, though that’s probably also a bad thing, since it suggests a certain level of corruption.
Luckily that was our only dealings with the police, and we felt safe at all times during our stay in both countries.
Usually littering is a major problem in most places in Africa. It was therefore extremely pleasing to find that this
wasn’t the case in Zambia at all. We don’t know the reason for this, but we certainly enjoyed it throughout.

Next Page: Southern White-faced Owl – Moorings Camp.
Birders travelling to Eastern and Southern Africa are usually blessed with a number of good field guides, site guides and trip reports to choose from. However, Zambia seems to be in a half-forgotten transition zone between these two hotspots and we couldn't find a single field guide covering Zambia specifically - probably because there isn't one. “Birds of Africa South of the Sahara” by Sinclair and Ryan of course covers both countries, but we opted to bring a mix of East and South African field guides instead. A combination of “Field Guide to the Birds of Eastern Africa” by Stevenson and Fanshawe, and the Sasol “Birds of Southern Africa”, the last one covering Zimbabwe, worked well for us in combination with the very useful app “Birds of Zambia” by Frank Willems et al. In the field, books are generally our favourite tool, but the detailed distribution maps and text, the photos and not least the voice recordings on the app were extremely useful as a supplement. When it comes to site finding guides, “The Southern African Birdfinder” (Sasol) is the only one around, we think. It gives a pretty good overview of the possibilities in both countries, but though it’s both useful and a nice inspiration, it is perhaps not as detailed as you’d wish for, which is understandable given that it covers such a huge area.

“The Kingdom Field Guide to African Mammals”, which can also be bought as a pocket guide, still seems to be the one to bring if you have an interest in mammals as well. Lynx have recently started publishing a series of smaller field guides covering single countries or regions, based on the great “Handbook of the Mammals of the World”, and it’s probably a good bet that something covering this part of the World is in the pipeline.

As always, www.cloudbirders.com is the go-to place when searching for trip reports from other birders, and we found Nate Diaz’s report from 2019 particularly inspirational. Unfortunately, the report by Dries van de Loock and Hans Matheve wasn’t yet published when we planned our trip, but it looks like an absolute must-read paper from a very well-planned trip. Most other reports from independent travelers, and there aren’t that many, covered a different time of year, or were rather superficial, and as usual reports from the major tour companies were a nice read, but not very detailed in where to find what. What Cloudbirders is to birders, www.mammalwatching.com is to mammal watchers, but the reports here were also of fairly limited use to us, compared to what can be found from other Eastern and Southern African countries. Most visiting mammal watcher seems to focus on the South Luangwa Valley, a place we sadly didn’t find time for in our itinerary.

Finally, we’d like to thank Rockjumper guide Daniel Danckwerts very much for answering questions in the preliminary part of the planning process.

Sites

When visiting the very big African countries there are a lot of choices to be made, when it comes to which places to visit and which to leave out. Zimbabwe was fairly easy since we knew from an early stage that we would only have time for Hwange NP and possibly Victoria NP, but the choices in Zambia was much more difficult. The locations below, listed from northeast to southwest, are the ones we visited, the ones that were on the itinerary but were cancelled, and the ones that only just didn’t make the final cut – the last both in red.

**Bangweulu Wetlands:** One of two parks in Zambia run by African Parks - [www.africanparks.com](http://www.africanparks.com). To be honest, many parks in Africa are poorly run by governments for obvious, and less obvious, reasons, and we find the idea of a private company running them in a highly professional way, and with a focus on helping local communities as well, very interesting. These wetlands can be hard or impossible to reach by car in the rainy season, but we could probably have done it when we were there. An easy but expensive alternative is to fly in, and we would have loved to see this place which we hear is very nice. The main avian draw is no doubt the Shoebill, which is easier to find earlier in autumn when it breeds, but we were also keen to see the big herds of Lechwes, of the race smithemani - Black Lechwe, which can be found here. In the end, though, we had to leave Bangweulu out since African Parks never responded to our inquiry, which was rather surprising and disappointing.

**Mutinondo Wilderness:** It’s probably a little strange to strongly recommend a place we haven’t actually visited ourselves, but in this case, we feel safe to do so. Everything we ever heard or read about this place is positive, and the same can be said about our own dealings with the Mutinondo Wilderness Lodge - [www.mutinondozambia.com](http://www.mutinondozambia.com). They were quick to answer when we wrote, they were always eager to help in any way, their guest information material was excellent, including a detailed map of where to find the most interesting birds, and they themselves suggested that...
we should pay on arrival, rather than in advance, due to the risk of a Covid cancellation. Unfortunately, that was exactly what happened, and we were really sad to miss our 3 nights stay here! In addition to some beautiful scenery, Mutinondo is a great place to find specials like Chestnut-headed Flufftail, Bar-winged Weaver, Anchieta’s Barbet, Bocage’s Akalat, Laura’s Woodland Warbler, Brown-headed Apalis, various sunbirds and many more. There’s also a chance of seeing some lovely mammals here, but the absence of any of the “big, dangerous ones” means that you can go birding on foot, which to us is very attractive. The close proximity, relatively speaking, to Kasanka NP and Bangweulu wetlands makes this a must-visit place if you’re in the vicinity, we reckon.

Kasanka National Park: Truly a lovely park, with a nice mix of woodland, marshes and plains, and it seems pretty well run too. It is managed by the charity based Kasanka Trust Limited – https://kasanka.com/, which means that an added benefit to visiting the park is, that you’re supporting conservation as well as the local community – what’s not to like about that? We stayed for 3 nights at Wasa Lodge which is just one of two options in the park, unless you want to camp, Luwombwa Lodge being the other. However, since Luwombwa Lodge apparently is on a self-catering basis only, the choice was easy for us. The trust wasn’t always quick to respond to our e-mails but in the end, we managed to make the necessary arrangements. The lodge itself is a 12 km drive through nice miombo woodland from the gate at the highway, and lies beautifully on the shore of Lake Wasa. The staff here is primarily from the surrounding villages, which is nice, and the standard of both accommodation and food was pretty good. We paid $220 pp/night, which we think is quite fair given that it included both full board and game drives. Not included in that amount, though, is the park entry fee ($10 pp/day) and a vehicle fee (>$2 vehicle/day – locally registered), both payable at the gate in local currency (Kwacha) only.

Kasanka NP is no doubt best known for the spectacular congregation of Straw-coloured Fruit Bats between October and December. Approximately 10.000.000 bats gather here during that period and it is truly awe-inspiring to see them leave and return to their day roost, in a small patch of forest, at dusk and dawn. Another Kasanka special is the marsh
living Sitatunga, which can of course be found elsewhere, but probably nowhere as easily as here. We found several
grassing and resting on both our visits to the meadow overlooked by a small tower immediately south of the Pontoon
Campsite. Kinda Baboon and Puku are commonly seen in appropriate habitat throughout the park, and we did see a nice
selection of other mammals too, though the bigger ones are absent or not as numerous as in some of the more well-
known parks further south. On our drives through the park in the dark, speeding to and from the bat “hides”, we saw
good numbers of nocturnal mammals like genets and galagos, and a proper night-drive here surely would be interesting.
The park is very good for birding also, with a nice selection of marsh, riverine forest and miombo woodland species,
but to be honest we made a bit of a pig’s ear of our time here. Unfortunately, Simon, who’s the best bird guide on the
lodge, wasn’t available on the first two days of our visit, and a linguistic misunderstanding meant that the first
morning was spent on the BBC tree-platform looking at bats, rather than birds. It was actually a wonderful
experience, but the bats can be seen equally well late in the afternoon, while mornings are by far the best for birding.

The main reason for us not making the most of our stay, though, was the fact that we spent way too much time
chasing the elusive African Pitta. We knew that this would be our only chance to see it, now that the last week of our
trip had been cancelled, and with a proper chance of finding it in the far northwestern part of the park, we went all in.
Our efforts would have been justified had we actually found it, but now that we didn’t, it just meant that the good
birding-hours were all but wasted. However, it didn’t mean that our time here was a complete waste from a birding
perspective. Sadly, the Pel’s Fishing Owl at Pontoon wasn’t around when we were there (the caretaker at the camp site
keeps an eye out for them), but we did see some nice birds like Western Banded Snake Eagle, Wattled Crane, Dwarf
Bittern, African Broadbill, Böhm’s Flycatcher, Racket-tailed Roller, Hartlaub’s Babbler, Fülleborn’s Longclaw and Fawn-
breasted Waxbill along the way, and we also made a couple of good short stops on the last morning. The first one in
the riverine forest at Pontoon where we had excellent views of nice species like African Emerald Cuckoo, Purple-
throated Cuckooshrike, Dark-backed Weaver, Black-backed Barbet, Scaly-throated Honeyguide and quite a few
Böhm’s Bee-eaters, which by the way was more numerous in the park than expected. The second stop of the morning
was on our way back from Pontoon to Wasa Lodge, where we found a mixed species flock containing goodies like Sharp-
tailed Starling, Orange-winged Pytilia, Western Violet-backed and Western Miombo Sunbird, Rufous-bellied Tit,
Stierling’s Wren-Warbler and Collared Flycatcher in the miombo woodland. Birding the miombo here, by the way, is a
little like walking in a Northern European Forest in the wintertime. It’s very quiet most of the time, but then
occasionally a bird party containing several species moves through. Therefore, the best strategy is probably to move
fairly quickly along a road/track and stop for all birds seen or heard, no matter how common, to check if it’s part of a
bigger mixed species party. It was very nice with some last-minute success, and it gave us a good taste of what could
have been... – maybe next time.
Luapula River: By following the highway northwest for approximately 80 kilometres from the gate to Kasanka NP, we arrived at the Mukuku Bridge late one afternoon. This low bridge is several kilometres long and straddles the wetlands on both sides of the Luapula River very close to the DRC border. The wetlands here are actually the extreme southwestern part of the Bangweulu, and it was our hope that there would be lots of waterbirds around. There weren’t really, but we were delighted to find some fairly big herds of “Black” Lechwe close to the bridge. We were lucky to also see the very range restricted Katanga Masked Weaver here, a single Blue-breasted Bee-eater sitting in a small bush, and several Long-tailed Widowbirds in full breeding plumage. With a little more time, it could have been interesting to go here in the morning and maybe find some smaller tracks leading further into the wetlands. Coming here at a different season might also give another result – an interesting place for sure.

South Luangwa NP: No doubt the most popular eco-tourist destination in Zambia, especially among people with an interest in mammals. Having read a bunch of positive reviews, it was a place we’d have loved to visit but, in the end, we went for Hwange NP instead, since it was simply a better fit for our itinerary.

The Forest Inn: We had booked one night here, on what should have been our way back from Mutionondo to Lusaka, but this too was cancelled. The lodge - [https://forestinn-zambia.com/](https://forestinn-zambia.com/) - is ideally situated to break up this long drive, and is surrounded by an area of protected miombo woodland which is apparently very good for birding. An added feature here, and a big draw for us, is the chance of seeing Lord Derby’s Anomalure on the lodge grounds in the evening, when it emerges from its day roost.

Lusaka: Kenneth Kaunda International Airport in the eastern outskirts of Lusaka was our entry and exit point in Zambia, as it probably will be for most visitors. We arrived here in the afternoon, too late to drive on to the main locations in south central Zambia. Instead, we checked in at the lovely Pioneer Camp, and drove down Palabana Road as the sun set, before returning to one of the best meals of the trip. This dirt road goes through an agricultural area south of the airport and crosses a small stream some 7 kilometres from the T4 highway. Most of our time here, both in the afternoon and next morning, was spent near the stream where Red-backed Mannikins were gathering nesting material in the tall grass. We also saw quite a few other birds like Brown-throated Martin, African Yellow Warbler, Desert and Short-winged Cisticola, Sombre and Grey-olive Greenbul, Olive Sunbird and Brimstone Canary, which we found nowhere else. Immediately east of the stream there’s a track leading north. We didn’t take it, but it might be worth checking out, since it seems (looking at Google Maps) to follow the stream to a small lake. After a good morning along Palabana Road on our second day in Zambia, we moved on to the Lazy J Ranch and Stables which lies further south in the Leopard Hills area. The miombo woodland here is well-known among local birders and for good reason. Though the area isn’t very big, it’s still very good for birding, and we were happy to find several Souza’s Shrikes here.

Gwabi River Lodge/Zambezi River: This was supposed to be the final destination of our trip, and the place to find the much-wanted African Pitta. Sadly though, the bloody virus, or rather the reaction to the new Omicron variant, robbed us of that opportunity. There are several places to look for the pitta along the Zambezi River and its tributaries, but we reckon that the Gwabi River Lodge is probably the easiest place to find them if you’re on your own. In some years they are even displaying on the lodge grounds, but the access road is also a good place to find them apparently.

Lochinvar National Park: Situated on the Kafue Flats east of Kafue National Park. The virtual lack of big mammals in the park clearly reflects on the number of visitors, and we spent a full day here without meeting any other tourists at all. We appreciated the solitude but it’s less good news when it comes to the sustainability of the park, of course. It means that there is no accommodation except camping (or is it the other way round?) in the park, and a park like this, not generating an income to the local community, apart from the small park entry fee, will all too easily come under pressure from other interests. It’s a shame really, since it’s a very nice place and an excellent site for birds of both wetlands, dry plains and woodlands. We spent a wonderful day here driving from the gate to Lake Manyeke/Chunga, continuing west along the southern shore of the lake, and then back to the gate across the dry plains, compiling a

decent day-list along the way. Even if the park doesn't hold any true specials, we were very pleased to find a good variety of wetland birds including loads of Blacksmith Lapwings and Collared Pratincoles, impressive numbers of Caspian Plovers, African Skimmers, Blue-cheeked Bee-eaters and Luapula Cisticolas, an out of place White-fronted Plover, as well as lovely African Pygmy Geese and Rufous-bellied Herons. Unfortunately, we didn't find Denham's Bustard on the dry plains, but a couple of Black-bellied Bustards, good numbers of Grey Crowned Cranes and Yellow-throated Sandgrouses, a pair of Lappet-faced Vultures, Dickinson's Kestrel, Dusky Lark, Swallow-tailed Bee-eater, Hartlaub's Babbler and the always charming Southern Ground Hornbill were nice, and in general we did see quite a few birds here that we didn't find anywhere else on the trip. Another highlight here was the herds of Lechwe we found along the lake shore, the subspecies here being kafuensis - Kafue Lechwe. We also saw several Impalas, Oribis and Common Duikers as well as a single Common Slender Mongoose and two species of monkeys, but there's no doubt that this is primarily a birding destination, and we can definitely recommend a visit here.

Rather than camping in the national park, we stayed for two nights at Moorings Camp a one-hour drive from the gate. The thatched huts here were basic but okay, and we did a bit of afternoon birding, and a short night drive, in the area south of the camp. A morning here would have yielded more, of course, but we still managed to see nice things like Black Cuckoo, Southern White-faced Owl, Grey-headed Bushshrike, Red-throated Twinspot and Southern Lesser Galago.

Nkanga River Conservation Area: Though Chaplin's Barbet can be found in several places, Nkanga RCA is undoubtedly the best-known site for this Zambian endemic. The area is situated just a few kilometres north of Choma and is owned by three private farms, including the Bruce-Miller Game Farm. We made a courtesy call at the house and were greeted by the owner, Emma, who invited us for tea and biscuits, and pointing us in the right direction for the best place to find the barbets - very nice! It was our initial plan to visit this area by ourselves, staying at the Masuku Lodge which should be pretty good. However, the lodge was extremely slow to answer our inquiries, and seemed generally uninterested in accommodating us at the time. Since we were already pressed for time in the planning process, we felt that we had to go with the much more expensive but also much more convenient option of having Birding Zambia organise this part of the trip for us. After having visited the area, it is our impression that it can easily be done on your own, but you might need local help or lots of time and/or luck to find the barbets - look out for fruiting fig trees which they favour. While Masuku Lodge is the obvious choice of accommodation here, there are other possibilities. We stayed at a very nice place called Le Gite, Momba Farm which can be found on Airbnb, and is run by a charming elderly lady, Gillian, who prepared a lovely meal for us. The more adventurous will find a campsite on the banks of the stream running through the area. We visited the place looking for White-backed Night Heron, and while they were sadly not there, we did see other nice things such as Narina Trogon and the only African Black Ducks of the trip. Most of our birding here was done in good mature woodland, but we also visited several small lakes which held a surprising number of White-backed ducks and other waterbirds. In general, the birding in the area is excellent, and while it will always be an advantage having a guide with local knowledge, it's not really needed here, except maybe for the barbets.

Kafue NP: Not nearly as well-known as South Luangwa NP, but that only made it even more interesting for us, and had we made the south-central Zambia part of the trip on our own, we might well have included a visit to the southern part of Kafue NP. We were told that a new all-weather road through that part of the park now means that it is reachable year-round. South Kafue apparently is a good alternative for the endemic Black-cheeked Lovebird, should Machile IBA not be accessible. We also looked at some of the bush camps further north on the Kafue Floodplains, but they are rather expensive and are closed in the rainy season. However, they are an interesting option for a dry season visit for those interested in mammals, and seem to be reliable places for both Sable Antelope and African Wild Dog.

Machile Important Bird Area: The only other Zambian endemic, the Black-cheeked Lovebird, can be a little more difficult to get since it lives in more remote areas. As mentioned above, the southern parts of Kafue NP might be a good place to find it, and when the rainy season begins for real it might be the only place. However, the most well-known spot for the lovebirds is the Machile IBA which is situated south of Kafue NP and northwest of Livingstone. We don't know of any accommodation in the area and to get there we made a very early start from Livingstone. It's not that the distance from Livingstone is very long, but the main road becomes progressively worse as you travel west becoming atrocious at times. Once we left the "tarred" main road, proceeding north on smaller sandy tracks, the going became easier and much more comfortable, but it was soon clear to us that to find the right place for the lovebirds out here, a guide with local knowledge is essential. Mile after mile of crisscrossing small tracks will almost inevitably get you lost, and we don't recommend trying unless you bring camping equipment and lots of time. Even with a guide
this area becomes all but inaccessible once heavy rain sets in. The ground out here is primarily cotton soil which
becomes almost impossible to negotiate in the wet – don’t even try! We were lucky though, that it had only rained a
little prior to our arrival, and the tracks were still in perfectly good nick, thank God. The mopane woodland is quite
attractive and we found a good range of nice species here as well as in more bushy areas. Marico Flycatcher and
Sunbird, Scaly-feathered Weaver, Burchell’s Starling, Violet-eared Waxbill, Shaft-tailed Whydah, Long-tailed
Paradise Whydah and much more were seen here, but of course best of all was the lovebirds which we found without
too much trouble. Much to our satisfaction we even saw them really well, first with a pair sitting low in thorny bushes
and trees and later a bigger flock near a known drinking site. All in all, a really nice experience even if we had to spend
a lot of time in the car to get there, but as all birders know, time spend driving is also time spend birding (or catching
up on sleep), and we did see some very nice birds like African Cuckoo-Hawk and Southern Carmine Bee-eater along the
way too.

Nampene Island: This small island is situated by the northern shore of the Zambezi River west of Livingstone and
just a few kilometres east of Kasane in Botswana. The owner of the camp, Yakov Sabaq, was an excellent host for us
during our one-night stay on the island, and the camp itself is very nice with a wonderful dining area and good tented
accommodation – soon huts will be available too. We arrived in the afternoon but still in time to get great views of
Rock Pratincoles from the boat, and both Thick-billed and Southern Brown-throated Weavers in the reeds near the
dining area, before enjoying the evening migration of waterfowls as well as a spectacular sunset. Next morning, we
walked round the island seeing Red-billed Spurfowl, Schalow’s Turaco, Olive Woodpecker and a few different sunbirds,
before sailing back to the mainland. Here we birded the floodplains where goodies like Western Banded Snake Eagle
and Rosy-throated Longclaw were seen very well. Nampene Island is a really nice place for both birders and non-
birders alike, but remember to bring mosquito repellent.

Livingstone & Victoria Falls: For some visitors to Zambia, Livingstone could well be the point of entry or exit, and we
found the town to be rather nice and well kept. We spent a single night here, and had we been on our own, we would
probably have stayed at Fawlty Towers Hotel – yes, we’re that old and silly. Instead, we stayed at Thorn Tree House in
the southern outskirts of town, and while it was quite okay, either a cheaper option or staying by the river at The
Waterfront Lodge would have made more sense for us. We did actually go to The Waterfront Lodge for a drink late
one afternoon and found it quite nice, seeing good birds like African Finfoot, Rock Pratincole, White-crowned Lapwing,
Half-colored Kingfisher – probably breeding on the lodge grounds, African Black Swift and Olive Woodpecker while
relaxing at the bar. A couple of kilometres up the road from The Waterfront Lodge there's an area of sewage pools bordering the Mosi-oa-Tunya NP. We went for a walk here and found a few nice species like Greater Painted-Snipe and Ballion's Crake between the many African Swamphens and African Jacanas. However, this place would be so much more interesting if it wasn't almost completely covered by Water Hyacinths which is a true pest here, as in many other parts of the world, and it's now even spreading along The Zambezi River. When arriving in Livingstone on the 24th, we also made a short detour on the gravel roads in a dry area east of the highway, just before reaching town, but didn't really see much here. Much better was a short night drive in the southeastern outskirts of town before a late dinner. Several Steenboks, a Flap-necked Chameleon, expertly found by Wouter, and a Square-tailed Nightjar were all nice, but best was a couple of Zorillas seen really well together just a few metres from the road – great stuff! Great is hardly enough to describe the last place we visited near Livingstone. Victoria Falls is easily the most famous spot in both Zambia and Zimbabwe, and is no doubt also one of the most famous waterfalls in the world, and with good reason. Even now by the end of the dry season it was still magnificent, and we certainly didn't regret spending a couple of hours here while waiting for our covid test results on the Zimbabwean side. The vistas from various view-points here are phenomenal, Bushbucks seem to be common in the area and we even found a few beautiful orchids here. We took our lunch at The Lookout Café on the other side of the road, hoping to see some of the cliff nesting birds from here. We didn't see much, though, but the views were nice from here too, and the food was good.

Hwange National Park: African Wild Dog and Sable Antelope were both high on our "most wanted" list for this trip and in the end, we had to decide whether to look for them in South Luangwa NP or Hwange NP. A difficult choice indeed, but Hwange simply was a better fit with the rest of our itinerary since it's conveniently situated near Livingstone where we finished the first part of the trip. Furthermore, it was easy to find a local safari company who could organise this Zimbabwe extension for us, so in the end this felt like the right decision. People who have visited Hwange NP many years ago probably remember the camps and lodges as run down and poorly managed, but since private companies have been allowed to take charge, much has changed. We stayed at Robins Camp which is a good example of that change. The accommodation and food here is now very nice, and so was the compound in general. It lies in the less visited Matetsi Safari Area in the northern part of the national park, an area which is supposedly very good for Sable Antelope and with a decent chance for the Wild Dogs as well. It's a beautiful area with a mix of woodland and open plains, but unfortunately it had been raining prior to our arrival which meant that trees and bushes had sprouted fresh leaves, and though it looked nice, it made mammal watching in the wooded areas difficult. It also meant that mammals were much more scattered, not being dependent on a few eternal sources of water. As a consequence, we didn't see quite the number of mammals we hoped for and expected, and sadly we missed out on both our target species. It wasn't for a lack of trying, though, and we were lucky to get a driver/guide, Julius, who was only too pleased to stay out all day, instead of just the normal morning and afternoon game drives. Because of that, we reached places, in this very big park, we otherwise wouldn't have, which was nice even if it didn't get us the two top prices. One important drawback to staying inside the national park proper is that night drives are not permitted. This is only possible in some of the private concessions bordering the park and had we been aware of that at an earlier stage, it might have changed our choice of lodge. Anyway, we did see 20 different species of mammal here, from the smallest baby dormouse, found in a sink drain in the lavatory of a small observation tower, to the biggest elephants with which we had some wonderful encounters. A couple of young male lions, beautiful Greater Kudus and Roan Antelopes, a group of Black-backed Jackals and both Common Slender and Banded Mongoose were other good sightings here, and we did also see some nice birds. Of course, spending most of the time in a moving vehicle, albeit open, isn't the best way to find the smaller species, and we did miss Wouters' keen ears to pick up voices, but birds of prey were much more in evidence compared to Zambia, and we were glad to also find nice species like Kori Bustards, the very vocal Red-crested Korhaans, confiding Double-banded Sandgrouses, lovely Grey Crowned Cranes, African Skimmers, good views of a family of Verreaux's Eagle-Owls, Bronze-winged Courser, Bradford's Hornbills, Crimson-breasted Shrike, a surprising number of Shaft-tailed Whydahs and much more.

In addition to the places mentioned above, there are of course many more exciting options. The far northwestern part of Zambia bordering Angola and the DRC holds a range of highly interesting species, as does the far northeastern parts. Liuwa Plains in the west also looks like it's worth a visit, not least for the mammals, but there will always be hard choices to make, if you have limited time.

The following bird lists, daily as well as species by species, follow the IOC World Bird List version 11.2.

Daily lists

20/11.

Lusaka 15.30 - 16.15.
African Palm Swift 16, Common Swift 60, Little Swift 20, Black-winged Kite 4, Western Cattle Egret 350, Common Buzzard 1, Little Bee-eater 3, Red-necked Falcon 1pair with 1+ juv, Fork-tailed Drongo 3, Pied Crow 15, Dark-capped Bulbul 5, Wire-tailed Swallow 3, Mosque Swallow 3, Bronze Mannikin 2, African Pied Wagtail 4

21/11.

Palabana Road 5.30 - 7.30 & 11.30 - 12.00.
Helmeted Guineafowl 9, Natal Spurfowl 2-3, African Palm Swift 25, Common Swift 5, White-rumped Swift 2, Schalow’s Turaco 3, Senegal Coucal 1h+1, Jacobin Cuckoo 1, Klaas’s Cuckoo 1, Red-eyed Dove 4, Emerald-spotted Wood Dove 3, Tambourine Dove 1, Namaqua Dove 5, African Wattled Lapwing 3, Reed Cormorant 3, Western Cattle Egret 6, Black-winged Kite 3, African Cuckoo-Hawk 1ad, Brown Snake Eagle 1, Gabar Goshawk Iad, Lilac-breasted Roller 3, Broad-billed Roller 3, Brown-headed Kingfisher 2, Little Bee-eater 2, Crested Barbet 1h, Brown-necked Pigeon 3, Black-throated Wattle-eye 2, Orange-breasted Bushshrike 4, Black-backed Puffback 1, Tropical Boubou 5, Red-backed Shrike 11, Lesser Grey Shrike 3, Northern Fiscal 3, Fork-tailed Drongo 2, African Paradise Flycatcher 1m, Pied Crow 6, Rufous-naped Lark 1h, Sombre Greenbul 3, Grey-olive Greenbul 4, Dark-capped Bulbul 20, Banded Martin 1, Grey-rumped Swallow 4, Barn Swallow 250, Common House Martin 1, Red-breasted Swallow 4, Mosque Swallow 12, Lesser Striped Swallow 6, Red-faced Cisticola 3, Rattling Cisticola 1, Zitting Cisticola 1, Desert Cisticola 1, Tawny-flanked Prinia 2, Yellow-breasted Apalis 1, Grey-backed Camaroptera 1, Yellow-bellied Eremomela 1, Southern Yellow-white-eye 1, White-browed Scrub Robin 1, Collared Palm Thrush 1, Spotted Flycatcher 3, White-browed Robin-Chat 1h+2, Collared Sunbird 1m, Olive Sunbird 1, Variable Sunbird 1m, Northern Grey-headed Sparrow 14, Spectacled Weaver 2, Holub’s Golden Weaver 2, Southern Masked Weaver 10, Red-billed Quelea 3, Red-backed Mannikin 10, Common Waxbill 35, Blue Waxbill 12, Green-winged Pytilia 1, Red-throated Twinspot 1, Jameson’s Firefinch 4, Pin-tailed Whydah 1m+3, Yellow-fronted Canary 2, Brimstone Canary 4, African Marsh Rat 1.

Lazy J Ranch, Lusaka 7.30 - 11.15.
Helmeted Guineafowl 2, Swainson’s Spurfowl 4, Common Swift 2, Emerald-spotted Wood Dove 7,
African Cuckoo-Hawk 1, White-backed Vulture 1, Lesser Spotted Eagle 1, Lizard Buzzard 1, Common Buzzard 1, African Hoopoe 1, Green Wood Hoopoe h, Broad-billed Roller 1, European Bee-eater 20, Black-collared Barbet 1, Lesser Honeyguide 1, Chinspot Batis 3, Orange-breasted Bushshrike 1h, Black-crowned Tchagra 3, White-crested Helmetshrike 6-7, White-breasted Cuckooshrike 1, Black Cuckooshrike 1m+4f, Souza’s Shrike 1h+3, African Golden Oriole 1m+1f, Fork-tailed Drongo 16, African Paradise Flycatcher 4, Pied Crow 6, Southern Black Tit 1, Miombo Tit 1, Grey Penduline Tit 2, Dark-capped Bulbul 16, Red-capped Crombec 2, Willow Warbler 20, Grey-backed Camaroptera 2, Stierling’s Wren-Warbler 2, Southern Yellow White-eye 2, Yellow-bellied Hylia 2, African Spotted Creeper 1, Violet-backed Starling 1m, Kurricane Thrush 2, Southern Black Flycatcher 2, Pale Flycatcher 1, Spotted Flycatcher 9, Arnot’s Chat 1m+1f, Amethyst Sunbird 1m, Copper Sunbird 2, Yellow-throated Bush Sparrow 5, Northern Grey-headed Sparrow 5, Southern Masked Weaver 3, Yellow Bishop 2, Blue Waxbill 15, Wood Pipit 8, Tree Pipit 7, Yellow-fronted Canary 2m+2f, Black-eared Seedeater 1, Cabanis’s Bunting 1m.

African Savanna Hare 1, Steenbok 1.

Schalow’s Turaco – Lusaka.

Lusaka -> Mooring Camp 12.00 - 15.15.
Black-headed Heron 1, Black-winged Kite 8, Dark Chanting Goshawk 1ad, Yellow-billed Kite 1, Lilac-breasted Roller 17, Broad-billed Roller 4, Fork-tailed Drongo 6, Pied Crow 10, Northern Grey-headed Sparrow 15, African Pied Wagtail 1.

Moorings Camp 15.15 - 19.45.
Coqui Francolin h, Swainson’s Spurfowl 16, Square-tailed Nightjar 1m, African Palm Swift 20, Common Swift 4, Grey Go-away-bird 1, Diederik Cuckoo 1, Black Cuckoo 1, African Cuckoo 1, Ring-necked Dove 1, Emerald-spotted Wood Dove 8, Namaqua Dove 3, Black-headed Heron 1, European Honey Buzzard 1, Lesser Spotted Eagle 1, Southern White-faced Owl 1, Common Scimitarbill 2, Lilac-breasted Roller 1, Broad-billed Roller 7, Woodland Kingfisher 4, European Bee-eater 11, Black-collared Barbet 1,
Cardinal Woodpecker 1f, Grey-headed Bushshrike 1, Black-crowned Tchagra 1, Black-backed Puffback 1m+1, Tropical Boubou 4, Red-backed Shrike 7, Fork-tailed Drongo 10, African Paradise Flycatcher 5, Southern Black Tit 1, Flappet Lark 1, Terrestrial Brownbul 1, Dark-capped Bulbul 30, Barn Swallow 2, Red-breasted Swallow 4, Long-billed Crombec 1, Willow Warbler 2, Red-faced Cisticola 1, Rattling Cisticola 1, Tawny-flanked Prinia 1, Yellow-breasted Apalis 1, Grey-backed Camaroptera 2, Violet-backed Starling 1, Bearded Scrub Robin 1, White-browed Scrub Robin 1, Southern Black Flycatcher 1, Spotted Flycatcher 5, Ashy Flycatcher 1, Variable Sunbird 3, Red-billed Quelea 7, Yellow Bishop 3, Bronze Mannikin 20, Blue Waxbill 25, Green-winged Pytilia 2, Red-throated Twinspot 2m, Jameson’s Firefinch 2, Pin-tailed Whydah 1m+3, Long-tailed Paradise Whydah 2m+4, Golden-breasted Bunting 1.

Southern Lesser Galago 3, Smith’s Bush Squirrel 5, bat sp. 10, Common Slender Mongoose 2.

Moorings Camp – Lochinvar NP 5.30 – 6.40 & 18.00 – 19.00.

Natal Spurfowl 3, Emerald-spotted Wood Dove 3, Black-winged Kite 2, Green Wood Hoopoe 3, Lilac-breasted Roller 2, Broad-billed Roller 1, Meyer’s Parrot h, Fork-tailed Drongo 20, African Paradise Flycatcher 1m, Pied Crow 2, Rufous-naped Lark 1h, Dark-capped Bulbul 30, Red-breasted Swallow 4, Rattling Cisticola 1, Grey-backed Camaroptera 1, Meves’s Starling 1, White-browed Scrub Robin 1, White-browed Robin-Chat 2, Red-throated Twinspot 1pair, Cinnamon-breasted Bunting 2.

Red Rock Rat 1.

Lochinvar NP 6.40 – 18.00.

Kittlitz’s Plover 45, White-fronted Plover 1, Caspian Plover 110, Lesser Jacana 2, African Jacana 75, Black-tailed Godwit 12, Ruff 400+, Curlew Sandpiper 19, Little Stint 1, African Snipe 3, Common Sandpiper 6, Marsh Sandpiper 5, Wood Sandpiper 27, Common Greenshank 23, Collared Pratincole 600+, African Skimmer 275, Grey-headed Gull 40, Gull-billed Tern 30, Caspian Tern 20, Whiskered Tern 17, White-winged Tern 55, Yellow-billed Stork 4, African Openbill 70, White Stork 1, Marabou Stork 23, Reed Cormorant 8, African Sacred Ibis 17, Glossy Ibis 75, African Spoonbill 22, Squacco Heron 90, Rufous-bellied Heron 8, Western Cattle Egret 55, Grey Heron 4, Black-headed Heron 11, Goliath Heron 1, Purple Heron 2, Great Egret 30, Intermediate Egret 100, Black Heron 5, Little Egret 80, Hamerkop 2, Great White Pelican 9, Pink-backed Pelican 4, Black-winged Kite 1, White-backed Vulture 35, Lappet-faced Vulture 2, Black-chested Snake Eagle 1d, Tawny Eagle 1d, African Marsh Harrier 1m+4f/imm, Yellow-billed Kite 1, African Fish Eagle 6ad+2imm, Green Wood Hoopoe 8, Common Scimitarbill 1, Southern Ground Hornbill 2, Southern Red-billed Hornbill 1, Southern Yellow-billed Hornbill 1, African Grey Hornbill 9, Lilac-breasted Roller 18, Striped Kingfisher 2, Malachite Kingfisher 3, Pied Kingfisher 4, Swallow-tailed Bee-eater 2, Little Bee-eater 7, Blue-cheeked Bee-eater 45, Crested Barbet 1h, Cardinal Woodpecker 1, Dickinson’s Kestrel 1ad, Amur Falcon 3f, Orange-breasted Bushshrike 1h, Black-crowned Tchagra 1h, Brubru 1f, Magpie Shrike 1, Red-backed Shrike 12, Lesser Grey Shrike 2, Fork-tailed Drongo 25, African Paradise Flycatcher 2m+1f, Dusky Lark 1, Red-capped Lark 9, Dark-capped Bulbul 20, Sand Martin 3, Grey-rumped Swallow 70, Pearl-breasted Swallow 2, White-throated Swallow 2, Barn Swallow 50, Little Rush Warbler 1, Luapula Cisticola 22, Yellow-breasted Apalis 1, Burnt-necked Eremomela 3, Hartlaub’s Babbler 6, Wattled Starling 32, Greater Blue-eared Starling 3, Meves’s Starling 6, Kurrichane Thrush 1, Bearded Scrub Robin 1, Swamp Flycatcher 2, Collared Palm Thrush 4, African Stonechat 1m, Capped Wheatear 8, Southern Grey-headed Sparrow 10, White-browed Sparrow-Weaver 17, Southern Masked Weaver 3, Red-billed Quelea 75, Yellow-crowned Bishop 2, Southern Red Bishop 10+. 
Fan-tailed Widowbird 60, Quailfinch h, Blue Waxbill 90, Green-winged Pytilia 1, Jameson’s Firefinch 2, Village Indigobird 2, Pin-tailed Whydah 1m+2f, Western Yellow Wagtail 60, Cape Wagtail 1, African Pipit 70, Buffy Pipit 2. 
Malbrouck Monkey 4, Chacma Baboon 16, Smith's Bush Squirrel 3, Common Slender Mongoose 1, Impala 13, Oribi 6, Common Duiker 3, Lechwe 400.

Blue-cheeked Bee-eater – Lochinvar National Park.

23/11.

Moorings Camp -> Nkanga RCA 5.00 – 7.00. 

Nkanga RCA 7.00 – 18.00. 
White-faced Whistling Duck 7, White-backed Duck 4, Knob-billed Duck 13, Egyptian Goose 2, Blue-billed Teal 4, African Black Duck 1m+1f, Red-billed Teal 40, Southern Pochard 11, Helmeted Guineafowl 65, Coqui Francolin h, Natal Spurfowl 3-4, Swainson’s Spurfowl 12, African Palm Swift 2, White-rumped Swift 2, Grey Go-away-bird 4, Schalow’s Turaco 1, Diederik Cuckoo 2, Klaas’s Cuckoo 1, Red-chested Cuckoo 1, Red-eyed Dove 10, Ring-necked Dove 100+, Laughing Dove 7, Emerald-spotted Wood Dove 13, Namaqua Dove 2, Common Moorhen 7, Black Crake 4, Little Grebe 1, Blacksmith Lapwing 18, African Wattled Lapwing 14, Common Ringed Plover 1, Three-banded Plover 2, Lesser Jacana 1, African Jacana 18, Ruff 14, Marsh Sandpiper 1, Wood Sandpiper 12, Common Greenshank 2, Saddle-billed Stork 1ad, Marabou Stork 1, Reed Cormorant 3, White-breasted Cormorant 1, Glossy Ibis 1, African Spoonbill 1, Black-crowned Night Heron 3ad, Striated Heron 1, Squacco Heron 7, Rufous-bellied Heron 11, Western Cattle Egret 110, Grey Heron 6, Intermediate Egret 1,

Chameleon sp. 1.

Kasanka NP 15.30 – 21.30.

Spur-winged Goose 1, Common Swift 45, Schalow’s Turaco 1, Red-chested Cuckoo 2h, Emerald-spotted Wood Dove 2, African Wattled Lapwing 1pair with 2p, African Jacana 4-5, African Openbill 2, African Darter 26, Reed Cormorant 2, Dwarf Bittern 1, Squacco Heron 1, Western Cattle Egret 55, Black-winged Kite 1, White-backed Vulture 8, Crowned Eagle 1ad, African Fish Eagle 1ad, Southern White-faced Owl 1h, Crowned Hornbill 6, Blue-cheeked Bee-eater 4, Eurasian Hobby 13, Fork-tailed Drongo 1, Dark-capped Bulbul 1, Barn Swallow 300+, Western Yellow Wagtail 1.

African Savanna Elephant 1, Kinda Baboon 11, African Straw-coloured Fruit Bat 10,000,000, Large-spotted Genet 1, Hippopotamus h, Steenbok 1, Sitatunga 2m+8f/imm, Bushbuck 1, Puku 80.
2/12.

Kasanka NP 4.10 – 20.30,

White-backed Duck 5, Spur-winged Goose 3, African Pygmy Goose 2m+2f, Helmeted Guineafowl 2,
Red-necked Spurfowl 13, Fiery-necked Nightjar 1, Common Swift 45, Ross’s Turaco 1, Schalow’s Turaco 6,
Coppery-tailed Coucal h+3, African Emerald Cuckoo 1h, Red-chested Cuckoo 6h, Red-eyed Dove 1,
Emerald-spotted Wood Dove 5, Wattled Crane 2, African Wattled Lapwing 2, Lesser Jacana 2, African Jacana 21,
Whiskered Tern 4, African Openbill 1, African Darter 12, Reed Cormorant 5, Hadada Ibis 1, Dwarf Bittern 1,
Black-crowned Night Heron 1ad, Squacco Heron 1, Rufous-bellied Heron 1, Western Cattle Egret 36, Hamerkop 1,
Western Banded Snake Eagle 1, Bateleur 2, Wahlberg’s Eagle 5, Gabar Goshawk 2, Dark Chanting Goshawk 1ad,
Yellow-billed Kite 3, African Fish Eagle 1ad, Common Buzzard 4, African Wood Owl 2h+1, Narina Trogon 2,
African Hoopoe 2, Trumpeter Hornbill 6, Racket-tailed Roller 2, Brown-hooded Kingfisher 1,
Woodland Kingfisher 7, Pied Kingfisher 1, Böhm’s Bee-eater 3, Blue-cheeked Bee-eater 5, European Bee-eater 18,
Yellow-rumped Tinkerbird 1h, Black-backed Barbet 3, Eurasian Hobby 6, Meyer’s Parrot 1-2,
African Broadbill 4displ., Black-backed Puffback 1, African Golden Oriole 1m, Fork-tailed Drongo 4,
Common Square-tailed Drongo 1, African Paradise Flycatcher 1m+1f, Cabanis’s Greenbul 2-3, Dark-capped Bulbul 14,
Barn Swallow 20, African Reed Warbler 2-3h, Trilling Cisticola 2, Chirping Cisticola 1h, Hartlaub’s Babbler 8,
Violet-backed Starling 1m, Ashy Flycatcher 1, Amethyst Sunbird 1m, Fan-tailed Widowbird 25,
Yellow-mantled Widowbird 2m, Red-throated Twinspot 1m, Cinnamon-breasted Bunting 1,
Southern Lesser Galago 2, Thick-tailed Greater Galago 3, Blue Monkey 3, Malbrouck Monkey 35, Kinda Baboon 14,
Gambian Sun Squirrel 1, African Straw-colored Fruit Bat 10.000.000, Large-spotted Genet 3, Spotted Hyena h,
Hippopotamus h+4, Steenbok 2, African Buffalo 40, Sitatunga 1m, Bushbuck 3, Common Duiker 1, Puku 80.

Monitor Lizard 1.

3/12.

Kasanka NP 4.00 – 11.30.

Spur-winged Goose 1, Helmeted Guineafowl 2, Red-necked Spurfowl 7, Ross’s Turaco 1, Schalow’s Turaco 4h+3,
Coppery-tailed Coucal 2, Red-chested Cuckoo 13h, Red-eyed Dove 1h+4, Emerald-spotted Wood Dove 2,
African Wattled Lapwing 2, Lesser Jacana 1, African Jacana 17, Wood Sandpiper 2, Woolly-necked Stork 7, African Darter 11, Reed Cormorant 2, Western Cattle Egret 65, Hamerkop 1, Bateleur 3ad+1imm, Martial Eagle 1imm, Long-crested Eagle 1ad, Wahlberg’s Eagle 3, Guban Goshawk 1, Yellow-billed Kite 5, African Fish Eagle 3ad, Common Buzzard 3, Narina Trogon 2, Trumpeter Hornbill 6, Broad-billed Roller 7, Brown-hooded Kingfisher 3, Woodland Kingfisher 3, African Pygmy Kingfisher 1, Malachite Kingfisher 1, Half-collared Kingfisher 1, Pied Kingfisher 1, White-fronted Bee-eater 14, Böhm’s Bee-eater 13, European Bee-eater 18, Yellow-rumped Tinkerbird 1h, Black-backed Barbet 1, Greater Honeyguide 1, Green-backed Woodpecker 1, Eurasian Hobby 3, Black-throated Wattle-eye 1m, Orange-breasted Bushshrike 1, Black-backed Puffback 1, African Golden Oriole 1h, Fork-tailed Drongo 4, Common Square-tailed Drongo 1, Yellow-bellied Greenbul 1, Terrestrial Brownbul 1, Cabanis’s Greenbul h, Dark-capped Bulbul 20, Barn Swallow 35, Lesser Striped Swallow 4, Willow Warbler 1, Chirping Cisticola 3, Yellow-breasted Apalis 2, Hartlaub’s Babbler 4, Spotted Flycatcher 1, Böhm’s Flycatcher 1, White-browed Robin-Chat 1, African Stonechat 1m, Collared Sunbird 3, Spectacled Weaver 2, Dark-backed Weaver 2, Füllborn’s Longclaw 1, African Pipit 3.

Thick-tailed Greater Galago 4, Malbrouck Monkey 4, Kinda Baboon 17, African Straw-coloured Fruit Bat 6, Large-spotted Genet 1, Hippopotamus 15, Common Duiker 1, Puku 350.

Nile Crocodile 1.

Luapula River at Mukuku Bridge 16.30 – 18.30.

White-faced Whistling Duck 13, Little Swift 4, Coppery-tailed Coucal 3, African Wattled Lapwing 1, Marsh Sandpiper 1, Wood Sandpiper 1, Collared Pratincole 5, Reed Cormorant 12, Western Cattle Egret 11, Purple Heron 1, Black-winged Kite 1, African Marsh Harrier 14, Yellow-billed Kite 2, Common Buzzard 1, Blue-breasted Bee-eater 1, Eurasian Hobby 2, Red-backed Shrike 1, Pied Crow 2, Barn Swallow 20, African Stonechat 1, Katanga Masked Weaver 12, Fan-tailed Widowbird 27, Long-tailed Widowbird 5m+8f, African Pipit 6, Lechwe 350+.

Spotted Eagle-Owl 1 – Ksanka NP.

Kasanka NP 5.10 – 14.00.

Spur-winged Goose 1, Knob-billed Duck 2m+2f, Red-necked Spur-fowl 4, Ross’s Turaco 1h+1, Schalow’s Turaco 2h+1, Coppery-tailed Coucal 4, White-browed Coucal 1, Levaillant’s Cuckoo 1, Jacobin Cuckoo 2, Klaas’s Cuckoo 1f, African Emerald Cuckoo 2m+1f, Red-cheested Cuckoo 7h+1, Red-eyed Dove 2, Emerald-spotted Wood Dove 1, African Green Pigeon 1, Black Crane 1, Black-faced Cuckoo-shrike 1, African Wattled Lapwing 5, African Jacana 9, African Openbill 1, Abdim’s Stork 18, Woolly-necked Stork 4, Saddle-billed Stork 1, African Darter 7, Reed Cormorant 5, Squacco Heron 1, Rufous-bellied Heron 1, Western Cattle Egret 65, Great Egret 1, Little Egret 6, Hamerkop 4, White-backed Vulture 14, Western Banded Snake Eagle 1, Martial Eagle 1imm, Wahlberg’s Eagle 2, African Marsh Harrier 1, Yellow-billed Kite 2, African Fish Eagle 3ad+1imm, Common Buzzard 4, Speckled Mousebird 7, Narina Trogon 1h, Crowned Hornbill 1, Trumpeter Hornbill 2, Brown-hooded Kingfisher 1, Woodland Kingfisher 3, Malachite Kingfisher 1, Pied Kingfisher 1, Little Bee-eater 1, Böhm’s Bee-eater 16, European Bee-eater 10, Yellow-rumped Tinkerbird 2h, Black-backed Barbet 1pair+1, Scaly-throated Honeyguide 1, Greater Honeyguide 1, Eurasian Hobby 3, Chinspot Batis 1, Orange-breasted Bushshrike 1, Black-backed Puffback 1, Retz’s Helmetshrike 7, Black Cuckoo-shrike 1m+1f, Purple-throated Cuckoo-shrike 1m+1f, Black-headed Oriole 1, Fork-tailed Drongo 10, Common Square-tailed Drongo 2, African Paradise Flycatcher 2, White-winged Black Tit 1, Rufous-bellied Tit 2, Grey Penduline Tit 2, Yellow-throated Leaflove 3, Terrestrial Brownbul 1, Dark-capped Bulbul 25, Barn Swallow 30, Lesser Striped Swallow 2, Moustached Grass Warbler 1, Trilling Cisticola 2h, Croaking Cisticola 2h, Stierling’s Wren-Warbler 1, Sharp-tailed Starling 2, Violet-backed Starling 2m+1f, Kurrichane Thrush 1, Spotted Flycatcher 2, White-browed Robin-Chat 1, Collared Flycatcher 1, African Stonechat 1m, Western Violet-backed Sunbird 1f, Amethyst Sunbird 2m, Western Mwombo Sunbird 1m, Spectacled Weaver 6, Holub’s Golden Weaver 1pair, Dark-backed Weaver 5, Yellow-mantled Widowbird 2m+4f, Fawn-breasted Waxbill 7, Orange-winged Pytilia 1f, Red-throated Twinspot 1pair, Blue Monkey 2, Malbrouck Monkey 8, Kinda Baboon 25, Gambian Sun Squirrel 1, Common Warthog 7.
Hippopotamus 10, Steenbok 1, Sitatunga 10, Puku 150.

Kasanka NP -> Lusaka 14.00 - 00.20.
Pennant-winged Nightjar 1f/imm, Western Cattle Egret 30, Black-winged Kite 2, Yellow-billed Kite 1, Miombo Pied Barbet 1, Lanner Falcon 1, African Paradise Flycatcher 1, Pied Crow 4, Barn Swallow 20, White-browed Scrub Robin 1.

5/12.

Lusaka 7.00 – 13.15.
Red-faced Mousebird 3, Yellow-fronted Tinkerbird 1h, Pied Crow 2, Dark-capped Bulbul 2.

</tbody>
</table>
**African Palm Swift** (*Cypsiurus parvus*)
- Very common and widespread, though none seen in Kasanka NP.

**Common Swift** (*Apus apus*)
20/11 60 Lusaka International Airport.
20+21/11 50+5 Palabana Road, Lusaka.
21/11 2 Lazy J Ranch, Lusaka.
21/11 4 Moorings Camp.
1+2/12 45+45 Kasanka NP.

**African Black Swift** (*Apus barbatus*)
24/11 16 Zambezi River, Livingstone.
- Only seen late in the afternoon feeding above the river.

**Little Swift** (*Apus affinis*)
- Very common and widespread.

**White-rumped Swift** (*Apus caffer*)
20+21/11 3+2 Palabana Road, Lusaka.
23/11 2 Nkanga RCA.

**Grey Go-away-bird** (*Crinifer concolor*)
21/11 1 Moorings Camp.
22/11 12 Lochinvar NP.
23/11 4 Nkanga RCA.
25/11 8 Livingstone – Machile IBA.
26-30/11 1+8+16+5+3 Hwange NP.

**Ross’s Turaco** (*Tauraco rossae*)
2-4/12 1+1+2 Kasanka NP.
- Surely one of the best-looking birds of the trip.

**Schalow’s Turaco** (*Tauraco schalowi*)
20+21/11 2+2 Palabana Road, Lusaka.
23/11 1 Nkanga RCA.
26/11 h Nampene Island.
1-4/12 1+6+7+3 Kasanka NP

**Kori Bustard** (*Ardeotis kori*)
29/11 3 Hwange NP.

**Red-crested Korhaan** (*Lophotis ruficrista*)
27-30/11 3+3+11+1 Hwange NP.
- Seen in display flight on a single occasion, but the far-carrying call was heard frequently. You really appreciate how loud it is when the birds are close!

**Black-bellied Bustard** (*Lissotis melanogaster*)
22/11 2 Lochinvar NP.

**Senegal Cuckoo** (*Centropus senegalensis*)
20+21/11 3+2 Palabana Road, Lusaka.

**Coppery-tailed Cuckoo** (*Centropus cupreicaudus*)
22/11 12 Lochinvar NP.
24/11 1 Livingstone.
26/11 2 Nampene Floodplains.
2-4/12 3+2+4 Kasanka NP.
3/12 3 Luapula River.

**White-browed Cuckoo** (*Centropus superciliosus*)
25+26/11 1+1 Nampene Island.
26-30/11 1+13+18+7+2 Hwange NP.
4/12 1 Kasanka NP.

**Great Spotted Cuckoo** (*Clamator glandarius*)
27/11 1 Hwange NP.

**Levaillant’s Cuckoo** (*Clamator levaillantii*)
25/11 1 Livingstone – Machile IBA.
28+29/11 1+2 Hwange NP.
4/12 1 Kasanka NP.

**Jacobin Cuckoo** (*Clamator jacobinus*)
21/11 1 Palabana road, Lusaka.
24/11 2 Livingstone.
4/12 2 Kasanka NP.

**Diederik Cuckoo** (*Chrysococcyx caprius*)
21/11 1 Moorings Camp.
23/11 2 Nkanga RCA.
25/11 1 Livingstone – Machile IBA.
26/11 2 Nampene Floodplains.
29+30/11 2+1 Hwange NP.

**Klaas’s Cuckoo** (*Chrysococcyx klaas*)
21/11 1 Palabana Road, Lusaka.
23+24/11 1+3 Nkanga RCA.
24/11 2 Livingstone.
26/11 2 Nampene Island.
4/12 1 Kasanka NP.

**African Emerald Cuckoo** (*Chrysococcyx cupreus*)
2+4/12 1+3 Kasanka NP.

**Black Cuckoo** (*Cuculus clamosus*)
21/11 1 Moorings Camp.

**Red-chested Cuckoo** (*Cuculus solitarius*)
23/11 1 Nkanga RCA.
25+16/11 1+1 Nampene Island.
1-4/12 2+6+13+8 Kasanka NP.

**African Cuckoo** (*Cuculus gularis*)
21/11 1 Moorings Camp.
24/11 4 Nkanga RCA.
25/11 4 Livingstone – Machile IBA.
Common Cuckoo (*Cuculus canorus*)
23/11 1 Nkanga RCA.
25/11 1 Machile IBA.

Yellow-throated Sandgrouse (*Pterocles gutturalis*)
22/11 120 Lochinvar NP.
25/11 3 Livingstone – Machile IBA.
27/11 3 Hwange NP.

Double-banded Sandgrouse (*Pterocles bicinctus*)
27-29/11 3+4+7 Hwange NP.

Namaqua Dove – Hwange National Park.

Speckled Pigeon (*Columba guinea*)
26-30/11 35 Hwange NP.
- Up to 35 birds came in to roost in the tower at Robins Camp each night, and were seen in the mornings as well.

Mourning Collared Dove (*Streptopelia decipiens*)
25/11 20 Livingstone – Machile IBA.
26/11 1 Nampene Island.
26-30/11 2+8+8+4+2 Hwange NP.
- The birds on 25th November were sitting on the main road together with loads of Ring-necked Doves.

Red-eyed Dove (*Streptopelia semitorquata*)
- Common and widespread with a total of 93 birds seen and heard.

Ring-necked Dove (*Streptopelia capicola*)
- Abundant in the South.

Laughing Dove (*Spilopelia senegalensis*)
23/11 1 Moorings Camp – Nkanga RCA.
23/11 7 Nkanga RCA,
25/11 1 Nampene Floodplains.
27/11 1 Hwange NP.
- Surprisingly uncommon. Possibly overlooked to some extent?

Emerald-spotted Wood Dove (*Turtur chalcospilos*)
- Seen and heard just about everywhere with a total of 88 birds.

Tambourine Dove (*Turtur tympanistra*)
20+21/11 3+1 Palabana Road, Lusaka.

Namaqua Dove (*Oena capensis*)
- Fairly common and widespread. 52 birds were seen in total.
African Green Pigeon (*Treron calvus*)
25/11 2 Nampene Island.
1/12 1 Lusaka - Kasanka NP.
4/12 1 Kasanka NP.

African Finfoot (*Podica senegalensis*)
24/11 1 Zambezi River, Livingstone.
- Seen from Waterfront Lodge swimming along the northern shore of the river.

Lesser Moorhen (*Paragallinula angulata*)
27/11 1 Hwange NP.

Common Moorhen (*Gallinula chloropus*)
22/11 12 Lochinvar NP.
23+24/11 7+22 Nkanga RCA.
29/11 2 Hwange NP.

African Swamphen (*Porphyrio madagascariensis*)
22/11 1 Lochinvar NP.
24/11 21 Livingstone.

Black Crake (*Zapornia flavirostra*)
22/11 6 Lochinvar NP.
23+24/11 4+7 Nkanga RCA.
24/11 7 Livingstone.
26-29/11 1+1+1+1 Hwange NP.
4/12 1 Kasanka NP.

Baillon’s Crake (*Zapornia pusilla*)
24/11 1 Livingstone.
- An uncommon bird in Zambia, and we were lucky to see it really well in the southernmost pond.

Grey Crowned Crane (*Balaeniceps regulorum*)
22/11 52 Lochinvar NP.
27/11 7 Hwange NP.

Wattled Crane (*Grus carunculata*)
2/12 2 Kasanka NP.

Little Grebe (*Tachybaptus ruficollis*)
22/11 4 Lochinvar NP.
23+24/11 1+1 Nkanga RCA.
29/11 2 Hwange NP.

Greater Flamingo (*Phoenicopterus roseus*)
28/11 1 Hwange NP.

Water Thick-knee (*Burhinus vermiculatus*)
24/11 2 Livingstone.
25+26/11 2+3 Nampene Island.
26-29/11 1+5+18+9 Hwange NP.

Black-winged Stilt (*Himantopus himantopus*)
22/11 24 Lochinvar NP.
24/11 1 Livingstone.
25/11 3 Nampene Island.
27-29/11 34+89+36 Hwange NP.

Pied Avocet (*Recurvirostra avosetta*)
22/11 1 Lochinvar NP.
27+28/11 2+2 Hwange NP.

Long-toed Lapwing (*Vanellus crassirostris*)
22/11 60 Lochinvar NP.
24/11 4 Livingstone.

Blacksmith Lapwing (*Vanellus armatus*)
22/11 750+ Lochinvar NP.
23+24/11 18+2 Nkanga RCA.
24/11 12 Livingstone.
26-29/11 2+405+320+210 Hwange NP.

White-crowned Lapwing (*Vanellus albiceps*)
22/11 750+ Lochinvar NP.
23+24/11 18+2 Nkanga RCA.
24/11 12 Livingstone.
26-29/11 2+405+320+210 Hwange NP.

White-fronted Lapwing (*Vanellus marginatus*)
22/11 1570+ Lochinvar NP.
23+24/11 18+2 Nkanga RCA.
24/11 12 Livingstone.
26-29/11 2+405+320+210 Hwange NP.

Common Ringed Plover (*Charadrius hiaticula*)
22/11 21 Lochinvar NP.
23/11 1 Nkanga RCA.
24/11 1 Luapula River.

Kittlitz’s Plover (*Charadrius pecuarius*)
22/11 45 Lochinvar NP.
27-29/11 1+1+1 Hwange NP.

Three-banded Plover (*Charadrius tricollaris*)
23/11 2 Nkanga RCA.
24/11 4 Livingstone.
27-29/11 6+8+5 Hwange NP.

White-fronted Plover (*Charadrius marginatus*)
22/11 1 Lochinvar NP.
- A bit of a surprise to find it here, since it’s usually associated with sandbars along the bigger rivers.
**Caspian Plover** *(Charadrius asiaticus)*
22/11 110 Lochinvar NP.
- All seen in recently burnt grassy areas along the lake shore.

**Greater Painted-snipe** *(Rostratula benghalensis)*
24/11 4 Livingstone.
- Seen at the second sewage pool from the north in the southern outskirts of town.

**Lesser Jacana** *(Microparra capensis)*
22/11 2 Lochinvar NP.
23/11 1 Nkanga RCA.
2+3/12 2+1 Kasanka NP.

**African Jacana** *(Actophilornis africanus)*
22/11 75 Lochinvar NP.
23+24/11 18+8 Nkanga RCA.
24/11 15 Livingstone.
26-29/11 1+1+2 Hwange NP.
1-4/12 4+21+17+9 Kasanka NP.

**Black-tailed Godwit** *(Limosa limosa)*
22/11 12 Lochinvar NP.

**Ruff** *(Calidris pugnax)*
22/11 400+ Lochinvar NP.
23+24/11 14+19 Nkanga RCA.
27-29/11 36+85+17 Hwange NP.

**Curlew Sandpiper** *(Calidris ferruginea)*
22/11 19 Lochinvar NP.

**Little Stint** *(Calidris minuta)*
22/11 17 Lochinvar NP.
27-29/11 6+14+14 Hwange NP.

**Common Sandpiper** *(Actitis hypoleucus)*
22/11 6 Lochinvar NP.
26/11 2 Nampene Island.
27-29/11 4+4+3 Hwange NP.

**Marsh Sandpiper** *(Tringa stagnatilis)*
22/11 5 Lochinvar NP.
23/11 1 Nkanga RCA.
27-29/11 4+4+4 Hwange NP.
3/12 1 Kasanka NP.
Wood Sandpiper (Tringa glareola)
22/11  27  Lochinvar NP.
23/11  12  Nkanga RCA.
24/11  11  Livingstone.
25/11  1  Livingstone - Machile IBA.
27-29/11  24+26+5  Hwange NP.
30/11  7  Victoria Falls.
3/12  2  Kasanka NP.
3/12  1  Luapula River.

Common Greenshank (Tringa nebularia)
22/11  23  Lochinvar NP.
23/11  2  Nkanga RCA.
25/11  2  Nampene Island.
26-29/11  1+1+3+2  Hwange NP.

Bronze-winged Courser (Rhinoptilus chalcopterus)
27/11  5  Hwange NP.
- Flushed by the car when we passed them, but seen very well.

Collared Pratincole (Glareola pratincola)
22/11  600+  Lochinvar NP.
25+26/11  62+20  Nampene Island.
27-29/11  1+24+6  Hwange NP.
3/12  5  Luapula River.
- The impressive numbers in Lochinvar NP included quite a few juvenile birds.

Rock Pratincole (Glareola nuchalis)
24/11  8  Zambezi River, Livingstone.
25+26/11  23+13  Nampene Island.
- Seen particularly well from the boat near Nampene Island.

African Skimmer (Rynchops flavirostris)
22/11  275  Lochinvar NP.
28/11  11  Hwange NP.

Grey-headed Gull (Chroicocephalus cirrocephalus)
22/11  40  Lochinvar NP.
27+28/11  1+1  Hwange NP.

Gull-billed Tern (Gelochelidon nilotica)
22/11  30  Lochinvar NP.

Caspian Tern (Hydroprogne caspia)
22/11  20  Lochinvar NP.

Whiskered Tern (Chlidonias hybrida)
22/11  17  Lochinvar NP.
27+28/11  1+2  Hwange NP.
2/12  4  Kasanka NP.

White-winged Tern (Chlidonias leucopterus)
22/11  55  Lochinvar NP.
28/11  9  Hwange NP.

Yellow-billed Stork (Mycteria ibis)
22/11  4  Lochinvar NP.
27+28/11  1+21  Hwange NP.

African Openbill (Anastomus lamelligerus)
22/11  70  Lochinvar NP.
24/11  3  Livingstone.
25+26/11  29+11  Nampene Island.
1+2+4/12  2+1+1  Kasanka NP.

Black Stork (Ciconia nigra)
30/11  4  Hwange NP.
- 3 adults and 1 immature seen together feeding in a river near the main road on our way out of the park.

Abdim's Stork (Ciconia abdimii)
1/12  1  Lusaka - Kasanka NP.
4/12  18  Kasanka NP.

Woolly-necked Stork (Ciconia episcopus)
27+28/11  6+2  Hwange NP.
3+4/12  7+4  Kasanka NP.

White Stork (Ciconia ciconia)
22/11  1  Lochinvar NP.

Saddle-billed Stork (Ephippiorhynchus senegalensis)
23/11  1  Nkanga RCA.
27+28+29/11  3+1+1  Hwange NP.
4/12  1  Kasanka NP.

Marabou Stork (Leptoptilos crumenifer)
22/11  23  Lochinvar NP.
23/11  1  Nkanga RCA.
25/11  1  Livingstone - Machile IBA.
26+28+29/11  1+1+1  Hwange NP.

African Darter (Anhinga rufa)
24/11  1  Zambezi River, Livingstone.
25+26/11  2+3  Nampene Island.
28/11  2  Hwange NP.
1-4/12  26+12+11+7  Kasanka NP.

Reed Cormorant (Microcarbo africanus)
- Fairly common throughout. 85 birds were seen.

White-breasted Cormorant (Phalacrocorax lucidus)
23/11  1  Nkanga RCA.
28-30/11  6+1+2  Hwange NP.

African Sacred Ibis (Threskiornis aethiopicus)
22/11 17 Lochinvar NP.
24/11 24 Livingstone.
25+26/11 2 Nampene Island.
27+28/11 13+14 Hwange NP.

Hadada Ibis (Bostrychia hagedash)
24/11 1 Livingstone.
25/11 1 Nampene Island.
2/12 1 Kasanka NP.
28/11 1 Hwange NP.

Glossy Ibis (Plegadis falcinellus)
22/11 75 Lochinvar NP.
23/11 1 Nkanga RCA.
24/11 13 Livingstone.

African Spoonbill (Platalea alba)
22/11 22 Lochinvar NP.
23/11 1 Nkanga RCA.
28/11 6 Hwange NP.

Dwarf Bittern (Ixobrychus sturmii)
1+2/12 1+1 Kasanka NP.
- Both flushed by our car. They seem to like feeding along the forest roads and aren’t, by all accounts, an uncommon sight around here once the rains start. The last bird was seen extremely well over an extended period of time.

Black-crowned Night Heron (Nycticorax nycticorax)
- Eight records scattered throughout the trip added up to 18 birds all in all.

Striated Heron (Butorides striata)
- A total of 11 birds were seen in southern Zambia and Hwange NP.

Squacco Heron (Ardeola ralloides)
22/11 90 Lochinvar NP.
23/11 7 Nkanga RCA.
24/11 7 Livingstone.
1+2+4/12 1+1+1 Kasanka NP.

Rufous-bellied Heron (Ardeola rufiventris)
22/11 8 Lochinvar NP.
23/11 11 Nkanga RCA.
25+26/11 6+2 Nampene Island.
2+4/12 1+1 Kasanka NP.

Western Cattle Egret (Bubulcus ibis)
- Abundant. Seen pretty much everywhere.

Grey Heron (Ardea cinerea)
22/11 4 Lochinvar NP.
23/11 6 Nkanga RCA.
26-29/11 2+4+6+3 Hwange NP.
1/12 1 Lusaka – Kasanka NP.

Black-headed Heron (Ardea melanocephala)
- Biggest numbers in Hwange NP, where we also found it breeding. A total of 65 birds were seen.

Goliath Heron (Ardea goliath)
22/11 1 Lochinvar NP.

Purple Heron (Ardea purpurea)
22/11 2 Lochinvar NP.
25+26/11 23+2 Nampene Island.
3/12 1 Luapula River.

Great Egret (Ardea alba)
22/11 30 Lochinvar NP.
25/11 1 Nampene Island.
28+29/11 1+1 Hwange NP.
4/12 1 Kasanka NP.

Intermediate Egret (Ardea intermedia)
22/11 100 Lochinvar NP.
23/11 1 Nkanga RCA.
24/11 2 Livingstone.

Black Heron (Egretta ardesiaca)
22/11 5 Lochinvar NP.
25+26/11 2+3 Nampene Island.

Little Egret (Egretta garzetta)
22/11 80 Lochinvar NP.
26-29/11 1+2+32+4 Hwange NP.
4/12 6 Kasanka NP.

Hamerkop (Scopus umbretta)
- Seen throughout but as always in low numbers. All in all, 24 birds were seen.

Great White Pelican (Pelecanus onocrotalus)
22/11 9 Lochinvar NP.

Pink-backed Pelican (Pelecanus rufescens)
22/11 4 Lochinvar NP.
**Secretarybird (Sagittarius serpentarius)**  
27+29/11 2+3  Hwange NP.

**Western Osprey (Pandion haliaetus)**  
24/11 1  Livingstone.

**Black-winged Kite (Elanus caeruleus)**  
- Fairly common throughout with a total of 65 birds.

**African Harrier-Hawk (Polyboroides typus)**  
23/11 1  Nkanga RCA.  
25/11 1  Livingstone - Machile IBA.  
29/11 2  Hwange NP.  
1/12 2  Lusaka - Kasanka NP.

**European Honey Buzzard (Pernis apivorus)**  
21/11 1  Moorings Camp.

**African Cuckoo-Hawk (Aviceda cuculoides)**  
21/11 1  Palabana Road, Lusaka,  
21/11 1  Lazy J Ranch, Lusaka.  
25/11 2  Livingstone - Machile IBA.  
- Zambia seems to be as good a place as any for this uncommon species, and we saw most of them really well.

**Hooded Vulture (Necrosyrtes monachus)**  
26/11 1  Nampene Island.  
27+30/11 1+1  Hwange NP.

**White-backed Vulture (Gyps africanus)**  
- Common and widespread.

**White-headed Vulture (Trigonoceps occipitalis)**  
29/11 3  Hwange NP.

**African Cuckoo-Hawk – Palabana Road, Lusaka.**

**Lappet-faced Vulture (Torgos tracheliotos)**  
22/11 2  Lochinvar NP.

**Black-chested Snake Eagle (Circaetus pectoralis)**  
22/11 1  Lochinvar NP.  
23/11 2  Nkanga RCA.  
25/11 3  Livingstone - Machile IBA.

**Brown Snake Eagle (Circaetus cinereus)**  
21/11 1  Palabana Road, Lusaka.  
23/11 2  Nkanga RCA.  
25/11 3  Livingstone - Machile IBA.  
27+28/11 1+1  Hwange NP
Western Banded Snake Eagle (*Circaetus cinerascens*)

26/11 1ad  Nampene Floodplains.
2+4/12 1+1 Kasanka NP.

*Bateleur* (*Terathopius ecaudatus*)

27-29/11 11+12+12 Hwange NP.
2+3/12 2+4 Kasanka NP.

*Crowned Eagle* (*Stephanoaetus coronatus*)

1/12 1 Kasanka NP.
- Seen waiting for the fruit bats to fly out from their day roost. We also found a nest in a patch of forest nearby, though we couldn’t tell if it was in use.

*Martial Eagle* (*Polemaetus bellicosus*)

27+29/11 1+1 Hwange NP.
3+4/12 1+1 Kasanka NP.
- The birds seen in Kasanka were both immature and could potentially have been the same individual.

*Long-crested Eagle* (*Lophaetus occipitalis*)

3/12 1 Kasanka NP.

*Lesser Spotted Eagle* (*Clanga pomarina*)

21/11 1 Lazy J Ranch, Lusaka.
21/11 1 Moorings Camp.
25/11 1 Machile IBA.
27/11 1 Hwange NP.

*Wahlberg’s Eagle* (*Hieraaetus wahlbergi*)

23+24/11 1+2 Nkanga RCA.
29/11 1 Hwange NP.
2-4/12 5+3+2 Kasanka NP.
- One of the birds in Nkanga RCA was seen in display flight.

*Booted Eagle* (*Hieraaetus pennatus*)

29/11 1 Hwange NP.
- Really good views of this light phase bird.

*Tawny Eagle* (*Aquila rapax*)

22/11 1 Lochinvar NP.
27+29/11 5+3 Hwange NP.
- One of the birds in Hwange was seen at very close range, waiting for us to move on so that it could get back to a kill.

*Steppe Eagle* (*Aquila nipalensis*)

27+29/11 3+1 Hwange NP.

*African Hawk-Eagle* (*Aquila spilogaster*)

24/11 1 Nkanga RCA.
26-30/11 1+8+5+2+1 Hwange NP.

*Lizard Buzzard* (*Kaupifalco monogrammicus*)

21/11 1 Lazy J Ranch, Lusaka.
23/11 3 Moorings Camp - Nkanga RCA.
23+24/11 2+2 Nkanga RCA.
25/11 2 Livingstone - Machile IBA.
26/11 1 Hwange NP.

*Gabar Goshawk* (*Micronisus gabor*)

21/11 1 Palabana Road, Lusaka,
25/11 1 Livingstone - Machile IBA.
2+3/12 2+1 Kasanka NP.

*Dark Chanting Goshawk* (*Melierax metabates*)

21/11 1 Lusaka - Moorings Camp,
25/11 1 Livingstone - Machile IBA.
2/12 1 Hwange NP.

*African Goshawk* (*Accipiter tachiro*)

24/11 2 Nkanga RCA.
25/11 1 Livingstone - Machile IBA.
30/11 2 Hwange NP.

*Shikra* (*Accipiter badius*)

25/11 2 Livingstone - Machile IBA.
27/11 2 Hwange NP.

*Little Sparrowhawk* (*Accipiter minullus*)

27+29/11 1+2 Hwange NP.

*African Marsh Harrier* (*Circus ranivorus*)

22/11 5 Lochinvar NP.
25/11 2 Livingstone - Machile IBA.
3/12 14 Luapula River.
4/12 1 Kasanka NP.

*Yellow-billed Kite* (*Milvus aegyptius*)
- Widespread and fairly common, though much less common than in many other parts of Africa. A modest 80 birds were seen in total.

*African Fish Eagle* (*Haliaeetus vocifer*)

22/11 8 Lochinvar NP.
23/11 2 Nkanga RCA.
25/11 1 Livingstone - Machile IBA.
26/11 1 Nampene Island.
29/11 2 Hwange NP.
1-4/12 1+1+3+4 Kasanka NP.

*Common Buzzard* (*Buteo buteo*)
- A total of 20 birds were seen throughout.

*Western Barn Owl* (*Tyto alba*)

24/11 1 Nkanga RCA.
30/11 1 Lusaka.
Pearl-spotted Owlet (Glaucidium perlatum)
26+27+29/11 1+2+3 Hwange NP.

African Scops Owl (Otus senegalensis)
26-29/11 1+1+1+1 Hwange NP.
- No doubt same bird heard calling in Robin’s Camp every night.

Southern White-faced Owl (Ptilopsis granti)
21/11 1 Moorings Camp.
1/12 1 Kasanka NP.
- Both birds were heard singing and the one at Moorings Camp also showed very well.

Spotted Eagle-Owl (Bubo africanus)
20/11 1 Pioneer Camp, Lusaka.
3/12 1 Kasanka NP.

Verreaux’s Eagle-Owl (Bubo lacteus)
28/11 4 Hwange NP.
- A pair with two almost fully grown youngsters seen on their day roost where they were all sitting together in the same tree.

African Wood Owl (Strix woodfordii)
20/11 2 Pioneer Camp, Lusaka.
24/11 2 Livingstone.
25/11 2 Nampene Island.
2/12 3 Kasanka NP.
- This doesn’t seem to be a very shy species, and the birds at Pioneer Camp and Nampene Island were seen particularly well.

Speckled Mousebird (Colius striatus)
4/12 7 Kasanka NP.

Red-faced Mousebird (Urocolius indicus)
24/11 22 Nkanga RCA.
25+26/11 3+5 Nampene Island.
27/11 11 Hwange NP.
1/12 6 Lusaka - Kasanka NP.
5/12 3 Lusaka.

Narina Trogon (Apaloderma narina)
23+24/11 3+1 Nkanga RCA.
2-4/12 2+2+1 Kasanka NP.
- As always mostly heard, but we had the chance to marvel at their stunning colours on a couple of occasions.
African Hoopoe (*Upupa africana*)
- Scattered records of single birds throughout. A total of 23 birds were seen.

Green Wood Hoopoe (*Phoeniculus purpureus*)
- Not seen in Kasanka NP, but otherwise common and widespread with a total of 98 birds.

Common Scimitarbill (*Rhinopomastus cyanomelas*)
- 21/11 2 Moorings Camp.
- 22/11 1 Lochinvar NP.
- 23/11 2 Nkanga RCA.

Southern Ground Hornbill (*Bucorvus leadbeateri*)
- 22/11 1 Lochinvar NP.
- 23/11 2 Nkanga RCA.
- 25/11 4 Livingstone - Machile IBA.
- 26-30/11 6+1+4 Hwange NP.

Southern Red-billed Hornbill (*Tochus rufirostris*)
- 22/11 1 Lochinvar NP.
- 23/11 1 Nkanga RCA.
- 26-30/11 65+150+250+200+32 Hwange NP.

Southern Yellow-billed Hornbill (*Tochus leucomelas*)
- 22/11 1 Lochinvar NP.
- 25/11 1 Livingstone - Machile IBA.
- 28-30/11 6+1+4 Hwange NP.

Bradfield’s Hornbill (*Lophoceros bradfieldi*)
- 28/11 2 Hwange NP.
- Unfortunately, just a couple of birds quickly flying by.

Crowned Hornbill (*Lophoceros alboterminatus*)
- 23/11 1 Moorings Camp - Nkanga RCA.
- 24/11 2 Nkanga RCA.
- 1+4/12 6+1 Kasanka NP.

African Grey Hornbill (*Lophoceros nasutus*)
- 22/11 9 Lochinvar NP.
- 23+24/11 3+3 Nkanga RCA.
- 24/11 1 Livingstone.
- 26-30/11 4+10+6+5+3 Hwange NP.

Trumpeter Hornbill (*Bycanistes bucinator*)
- 23+24/11 4+8 Nkanga RCA.
- 24/11 13 Zambezi River, Livingstone.
- 25+26/11 7+2 Nampene Island.
- 30/11 3 Victoria Falls.
- 1/12 1 Lusaka - Kasanka NP.
- 2-4/12 6+6+2 Kasanka NP.

Purple Roller (*Coracias naevius*)
- 27+29+30/11 1+1+1 Hwange NP.

Racket-tailed Roller (*Coracias spatulatus*)
- 23/11 4 Nkanga RCA.
- 2/12 2 Kasanka NP.
- After chasing this species under a scorching sun in Nkanga, it was nice with more quiet chance encounter in Kasanka, where the birds were seen even better in fantastic morning light.

Lilac-breasted Roller (*Coracias caudatus*)
- This very widespread species was commonly seen throughout, except in Kasanka where it seemed to be strangely absent.

European Roller (*Coracias garrulus*)
- 23/11 1 Nkanga RCA.
- 25/11 1 Livingstone - Machile IBA.
- 28+30/11 2+2 Hwange NP.

Broad-billed Roller (*Erystomys glaucurus*)
- Fairly common and widespread with a total of 37 birds seen.

Grey-headed Kingfisher (*Halcyon leucocephala*)
- 24/11 2 Nkanga RCA.
- Surprisingly few seen, even though our visit coincided with the middle of the breeding season for this intra-African migrant.

Brown-hooded Kingfisher (*Halcyon albiventris*)
- 20+21/11 1+2 Palabana Road, Lusaka.
- 26/11 1 Nampene Island.
- 2-4/12 1+3+1 Kasanka NP.

Striped Kingfisher (*Halcyon chelicuti*)
- 22/11 2 Lochinvar NP.
- 23/11 3 Nkanga RCA.

Woodland Kingfisher (*Halcyon senegalensis*)
- 21/11 4 Moorings Camp.
- 23/11 1 Moorings Camp - Nkanga RCA.
- 23+24/11 3+1 Nkanga RCA.
- 25/11 2 Livingstone - Machile IBA.
- 2-4/12 7+3+3 Kasanka NP.

African Pygmy Kingfisher (*Ispidina picta*)
- 3/12 1 Kasanka NP.

Malachite Kingfisher (*Corythornis cristatus*)
- 22/11 3 Lochinvar NP.
- 23+24/11 1+1 Nkanga RCA.
- 25/11 1 Nampene Island.
- 29+30/11 1+1 Hwange NP.
- 3+4/2 1+1 Kasanka NP.
**Half-collared Kingfisher** (*Alcedo semitorquata*)
24/11 2  Zambezi River, Livingstone.
3/12 1  Kasanka NP.
- We saw it extremely well at Waterfront Lodge just outside Livingstone, where they are surely breeding.

**Giant Kingfisher** (*Megaceryle maxima*)
23/11 2  Nkanga RCA.
25/11 1  Livingstone – Machile IBA.
30/11 1  Hwange NP.

**Pied Kingfisher** (*Ceryle rudis*)
- A total of 26 birds were seen throughout.

**Swallow-tailed Bee-eater** (*Merops hirundineus*)
22/11 2  Lochinvar NP.

**Little Bee-eater** (*Merops pusillus*)
- Common and widespread with a total of 78 birds seen.

**Blue-breasted Bee-eater** (*Merops variegatus*)
3/12 1  Luapula River.
- Sitting in a small bush near the bridge. This recent split has retained the original name, while the northern population is now called Ethiopian Bee-eater.

**White-fronted Bee-eater** (*Merops bullockoides*)
25+26/11 9+1  Nampene Island.
30/11 6  Victoria Falls.
3/12 14  Kasanka NP.

**Böhm’s Bee-eater** (*Merops boehmi*)
2-4/12 3+13+16  Kasanka NP.
- More easily found than expected. They seem to prefer patches of forest near rivers and marshes. Apparently, they lose their tail streamers during the breeding season, and sadly they were missing on all the birds we saw.

**Blue-cheeked Bee-eater** (*Merops persicus*)
20/11 3  Palabana Road, Lusaka.
22/11 45  Lochinvar NP.
25/11 8  Livingstone – Machile IBA.
25+26/11 6+2  Nampene Island.
27/11 1  Hwange NP.
1+2/12 4+5  Kasanka NP.
European Bee-eater (*Merops apiaster*)
- Common and widespread with a total of 198 birds seen. Almost always seen in flocks consisting of 10-30 individuals.

Southern Carmine Bee-eater (*Merops nubicoides*)
25/11 21 Livingstone – machile IBA.
27/11 5 Hwange NP.
- One of the coolest species anywhere!

Yellow-rumped Tinkerbird (*Pogoniulus bilineatus*)
2-4/12 1+1+2 Kasanka NP.

Yellow-fronted Tinkerbird (*Pogoniulus chrysoconus*)
23+24/11 1+1 Nkanga RCA.
26/11 1 Namphene Island.
5/12 1 Lusaka.

Miombo Pied Barbet (*Tricholaema frontata*)
23/11 1 Nkanga RCA.
4/12 1 Kasanka NP – Lusaka.

Chaplin’s Barbet (*Lybius chaplini*)
23/11 4 Nkanga RCA.
- Both adult and young birds of this cool Zambian endemic were seen quite well.

Black-collared Barbet (*Lybius torquatus*)
21/11 1 Lazy J Ranch, Lusaka.
21/11 1 Moorings Camp.
23/11 1 Moorings Camp – Nkanga RCA.
23+24/11 13+11 Nkanga RCA.
25/11 3 Livingstone – Machile IBA.
26/11 3 Namphene Floodplains.

Black-backed Barbet (*Lybius minor*)
1-4/12 3+1+3 Kasanka NP.

Crested Barbet (*Trachyphonus vaillantii*)
21/11 1 Palabana Road, Lusaka.
22/11 1 Lochinvar NP.
25/11 2 Livingstone – Machile IBA.
26-30/11 1+1+1 Hwange NP.
- Much more often heard than seen.

Lesser Honeyguide (*Indicator minor*)
21/11 1 Lazy J Ranch, Lusaka.
26/11 1 Namphene Island.

Scaly-throated Honeyguide (*Indicator variegatus*)
4/12 1 Kasanka NP.

Greater Honeyguide (*Indicator indicator*)
24/11 2 Livingstone.
3+4/12 1+1 Kasanka NP.

Bennett’s Woodpecker (*Campethera bennettii*)
23+24/11 1+3 Nkanga RCA.

Golden-tailed Woodpecker (*Campethera abingoni*)
23+24/11 1+1 Nkanga RCA.
26/11 1 Namphene Island.

Green-backed Woodpecker (*Campethera cailliautii*)
3/12 1 Kasanka NP.

Bearded Woodpecker (*Chloropicus namaquus*)
23+24/11 1+1 Nkanga RCA.

Cardinal Woodpecker (*Dendropicos fusescens*)
- Only 6 birds recorded but, like the other woodpeckers, no doubt overlooked to some extent.

Olive Woodpecker (*Dendropicos griseocephalus*)
24/11 1 Livingstone.
26/11 1 Namphene Island.

Dickinson’s Kestrel (*Falco dickinsoni*)
22/11 1 Lochinvar NP.

Red-necked Falcon (*Falco chicquera*)
20/11 3+ Lusaka.
- Our only record was a pair breeding in a palm tree at Waterfalls Mall. At least one juvenile was seen, but there could have been more around.

Amur Falcon (*Falco amurensis*)
22/11 3 Lochinvar NP.
23/11 1 Nkanga RCA.
28/11 4 Hwange NP.
30/11 2 Hwange NP.

Eurasian Hobby (*Falco subbuteo*)
- Widespread in low numbers except in Kasanka NP where it was quite numerous in late afternoons above marshy areas.

Lanner Falcon (*Falco biarmicus*)
25/11 1 Namphene Island.
28+29/11 1+2 Hwange NP.
4/12 1 Kasanka NP – Lusaka.
- Seen particularly well hunting at Hwange NP.

Brown-necked Parrot (*Poicephalus fuscicollis*)
20+21/11 4+3 Palabana Road, Lusaka.
- All were birds flying over.
Meyer’s Parrot (*Poicephalus meyeri*)
22/11 1 Moorings Camp.
23+24/11 4+1 Nkanga RCA.
25/11 1 Livingstone – Machile IBA.
27+28+30/11 3+2+1 Hwange NP.
2/12 1-2 Kasanka NP.

Black-cheeked Lovebird (*Agapornis nigritgensis*)
25/11 55 Machile IBA.
- One of only two Zambian endemics, so of course it was high on our wish list. Luckily, we found it without too much trouble and had much better views than could be expected. Seen both at the traditional drinking site and in the surrounding area.

African Broadbill (*Smithornis capensis*)
23+24/11 1+1 Nkanga RCA.
2/12 4 Kasanka NP.
- All found by the funny sound it makes while displaying. Seen really well, but as always difficult to get good photos since it keeps itself well hidden in the shade at all times.

Chinspot Batis (*Batis molitor*)
- A total of 15 birds were seen throughout, fairly evenly distributed.

Black-throated Wattle-eye (*Platysteira peltata*)
21/11 2 Palabana Road, Lusaka.
3/12 1 Kasanka NP.

Grey-headed Bushshrike (*Malaconotus blanchoti*)
21/11 1 Moorings Camp.
25/11 1 Nampene Island.

Orange-breasted Bushshrike (*C. sulfureopectus*)
- Widespread. We recorded 13 birds, including a pair building a nest on the floodplains near Nampene Island.

Brown-crowned Tchagra (*Tchagra australis*)
24/11 1 Nkanga RCA.
26/11 1 Nampene Floodplains.
27-29/11 1+2+13 Hwange NP.

Black-crowned Tchagra (*Tchagra senegalus*)
21/11 3 Lazy J Ranch, Lusaka.
21/11 1 Moorings Camp.
22/11 1 Lochinvar NP.
27+28/11 1+1 Hwange NP.

Black-backed Puffback (*Dryoscopus cubla*)
21/11 1 Palabana Road, Lusaka.
21/11 2 Moorings Camp.
23/11 2 Nkanga RCA.
24/11 1 Livingstone.
29+30/11 1+2 Hwange NP.
2-4/12 1+1+1 Kasanka NP.

Tropical Boubou (*Laniarius major*)
20+21/11 3+5 Palabana Road, Ludaka.
21/11 4 Moorings Camp.
23+24/11 4+5 Nkanga RCA.
24/11 2 Livingstone.
25/11 1 Livingstone – Machile IBA.
26/11 8 Nampene Island and Floodplains.
26-30/11 1+4+1+2+1 Hwange NP.

Crimson-breasted Shrike (*Laniarius atroccocineus*)
27/11 1 Hwange NP.
- Sadly, only a single bird was seen flying past. A shame really, not to get better views of this beauty.

Brubru (*Nilaus afer*)
22/11 1 Lochinvar NP.
27+28/11 1+1 Hwange NP.

White-crested Helmetshrike (*Prionops plumatus*)
21/11 6-7 Lazy J Ranch, Lusaka.
23/11 8 Nkanga RCA.
25/11 4 Machile IBA.
27-30/11 23+12+3+2 Hwange NP.
1/12 2 Lusaka – Kasanka NP.

Retz’s Helmetshrike (*Prionops retzii*)
25/11 8 Machile IBA.
4/12 7 Kasanka NP.

White-breasted Cuckooshrike (*Ceblepyris pectoralis*)
21/11 1 Lazy J Ranch, Lusaka.
25/11 1 Machile IBA.

Black Cuckooshrike (*Campephaga flava*)
21/11 5 Lazy J Ranch, Lusaka.
23/11 1 Nkanga RCA.
25/11 3 Machile IBA.
29/11 1 Hwange NP.
4/12 2 Kasanka NP.

Purple-throated Cuckooshrike (*Campephaga quiscalina*)
4/12 2 Kasanka NP.
- Seen well in a mixed species flock in the riverine forest at Pontoon.

Magpie Shrike (*Urolestes melanoleucus*)
22/11 1 Lochinvar NP.
23/11 1 Nkanga RCA.
25/11 3 Livingstone – Machile IBA.
26-30/11 4+37+16+16+11 Hwange NP.
Southern White-crowned Shrike (*E. anguitimens*)
27-29/11 4+9+1 Hwange NP.

**Souza's Shrike** (*Lanius souzae*)
21/11 4 Lazy J Ranch, Lusaka.
- This species was high on the wish list for some of us, and we were happy to see it really well in the miombo woodland here.

**Red-backed Shrike** (*Lanius collurio*)
- Common and widespread migrant, with a total of 76 birds seen on this trip.

**Lesser Grey Shrike** (*Lanius minor*)
21/11 3 Palabana Road, Lusaka.
22/11 2 Lochinvar NP.
23/11 2 Nkanga RCA.
27+28+29/11 5+2+3 Hwange NP.

**Northern Fiscal** (*Lanius humeralis*)
21/11 3 Palabana Road.
23/11 1 Nkanga RCA.

**Black-headed Oriole** (*Oriolus larvatus*)
4/12 1 Kasanka NP.

**African Golden Oriole** (*Oriolus auratus*)
- Widespread but in low numbers. All in all, we saw 25 birds, as well as a handful of unidentified golden orioles.

**Fork-tailed Drongo** (*Dicrurus adsimilis*)
- Very common and widespread.

**Common Square-tailed Drongo** (*Dicrurus ludwigii*)
2-4/12 1+1+2 Kasanka NP.

**African Paradise Flycatcher** (*Terpsiphone viridis*)
- Widespread. 26 birds recorded throughout.

**Pied Crow** (*Corvus albus*)
- Common and widespread, though almost entirely associated with human settlements. All in all, we counted 145 birds.

**White-winged Black Tit** (*Melanau's leucomelas*)
4/12 1 Kasanka NP.

**Southern Black Tit** (*Melaniparus niger*)
- Fairly common and widespread in Hwange NP and southern Zambia. A total of 22 birds were seen.
Rufous-bellied Tit (Melaniparus rufiventris)  
4/12  2  Kasanka NP.

Miombo Tit (Melaniparus griseiventris)  
21/11  1  Lazy J Ranch, Lusaka.  
23/11  3  Nkanga RCA.

Grey Penduline Tit (Anthoscopus caroli)  
21/11  3  Lazy J Ranch, Lusaka.  
23/11  2  Nkanga RCA.  
4/12  2  Kasanka NP.

Dusky Lark (Pinarocorys nigricans)  
22/11  1  Lochinvar NP.  
23/11  3  Nkanga NP.  
- Very nice with multiple observations of this range restricted species.

Chestnut-backed Sparrow-Lark (Eremoptrix leucotis)  
27+29/11  75+11  Hwange NP.

Sabota Lark (Calendulauda sabota)  
29/11  1  Hwange NP.

Rufous-naped Lark (Mirafra africana)  
21/11  1  Palabana Road, Lusaka.  
22/11  1  Moorings Camp - Lochinvar NP.  
23/11  7  Nkanga RCA.

Flappet Lark (Mirafra rufocinnamomea)  
21/11  1  Moorings Camp.  
23+24/11  3+1  Nkanga RCA.

Red-capped Lark (Calandrella cinerea)  
22/11  9  Lochinvar NP.  
29/11  1  Hwange NP.

Sombre Greenbul (Andropadus importunus)  
20+21/11  1+3  Palabana Road, Lusaka.

Yellow-throated Leaflove (Atimastillas flavicollis)  
4/12  2  Kasanka NP.

Yellow-bellied Greenbul (Chlorocichla flaviventris)  
23+24/11  2+2  Nkanga RCA.  
25+26/11  2+1  Nampene Island.  
30/11  1  Victoria Falls.  
3/12  1  Kasanka NP.

Terrestrial Brownbul (Phyllostrephus terrestris)  
21/11  1  Moorings Camp.  
26/11  3  Nampene Island and Floodplains.  
30/11  2  Victoria Falls.  
3+4/12  1+1  Kasanka NP.

Grey-olive Greenbul (Phyllostrephus cerviniventris)  
21/11  4  Palabana Road, Lusaka.

Cabanis’s Greenbul (Phyllostrephus cabanisi)  
2+3/12  2+h  Kasanka NP.

Dark-capped Bulbul (Pycnonotus tricolor)  
- Very commonly seen and heard just about everywhere.

Banded Martin (Neophedina cincta)  
21/11  1  Palabana Road, Lusaka.  
26/11  3  Nampene Island.

Sand Martin (Riparia riparia)  
22/11  3  Lochinvar NP.  
26/11  1  Nampene Island.

Brown-throated Martin (Riparia paludicola)  
20/11  6  Palabana Road, Lusaka.

Grey-rumped Swallow (Pseudhirundo griseopyga)  
20+21/11  4+4  Palabana Road, Lusaka.  
22/11  70  Lochinvar NP.  
26/11  6  Nampene Island.

Rock Martin (Ptyonoprogne fuligula)  
27/11  1  Hwange NP.  
30/11  5  Victoria Falls.

Pearl-breasted Swallow (Hirundo dimidiata)  
22/11  2  Lochinvar NP.

White-throated Swallow (Hirundo albigularis)  
22/2  2  Lochinvar NP.

Wire-tailed Swallow (Hirundo smithii)  
- Not seen North of Lusaka, but otherwise widespread and fairly common. 84 Birds seen in total.

Barn Swallow (Hirundo rustica)  
- Abundant in Zambia but much less so in Hwange NP.

**Common House Martin** *(Delichon urbicum)*
21/11 1 Palabana Road, Lusaka.
26/11 1 Nampene Island.
27/11 1 Hwange NP.

**Red-breasted Swallow** *(Cecropis semirufa)*
- Increasingly common from north to south. 85 birds were seen in total, though some have possibly been counted more than once.

**Mosque Swallow** *(Cecropis senegalensis)*
20/11 3 Lusaka.
20+21/11 20+12 Palabana Road, Lusaka.
1/12 6 Lusaka - Kasanka NP.

**Lesser Striped Swallow** *(Cecropis abyssinica)*
- A total of 68 birds were seen throughout.

**Moustached Grass Warbler** *(Melocichla mentalis)*
4/12 1 Kasanka NP.

**Long-billed Crombec** *(Sylvietta rufescens)*
20/11 1 Palabana Road, Lusaka.
21/11 1 Moorings Camp.
23/11 2 Nkanga RCA.
26/11 2 Nampene Island.

**Red-capped Crombec** *(Sylvietta ruficapilla)*
21/11 2 Lazy J Ranch, Lusaka.

**Willow Warbler** *(Phylloscopus trochilus)*
- Fairly common with a total of 37 birds. Most in a single location were 20 seen at Lazy J Ranch.

**Lesser Swamp Warbler Warbler** *(A. gracilirostris)*
24/11 2 Nkanga RCA.
25+26/11 1 Nampene Island.

**Great Reed Warbler** *(Acrocephalus arundinaceus)*
23/11 1 Nkabga RCA.

**African Reed Warbler** *(Acrocephalus baeticatus)*
26/11 2 Nampene Island.
2/12 2 Kasanka NP.

**African Yellow Warbler** *(Iduna natalensis)*
20/11 1 Palabana Road, Lusaka.

**Icterine Warbler** *(Hippolais icterina)*
23+24/11 1+3 Nkanga RCA.

**Little Rush Warbler** *(Bradypterus baboecla)*
22/11 1 Lochinvar NP.
23/11 1 Nkanga RCA.

**Red-faced Cisticola** *(Cisticola erythrops)*
20+21/11 4+3 Palabana Road, Lusaka.
21/11 1 Moorings Camp.

**Trilling Cisticola** *(Cisticola woosmani)*
2+4/12 2+2 Kasanka NP.

**Rattling Cisticola** *(Cisticola chiniana)*
- Widespread and fairly common with a total of 18 birds seen and/or heard, though none in Kasanka NP.

**Luapula Cisticola** *(Cisticola laupula)*
22/11 22 Lochinvar NP.
26/11 1 Luapula River.
- Nice to actually see the bird at the Luapula River. Zambia might be the easiest place to find this species.

**Chirping Cisticola** *(Cisticola pipiensis)*
25+16/11 1+1 Nampene Island.
2+3/12 1+3 Kasanka NP.

**Croaking Cisticola** *(Cisticola natalensis)*
23/3 3 Nkanga RCA.
4/12 2 Kasanka NP.

**Short-winged Cisticola** *(Cisticola brachypterus)*
20/11 2 Palabana Road, Lusaka.

**Neddicky** *(Cisticola fulvicapilla)*
23+24/11 2+2 Nkanga RCA.
- In a time when bird names are being changed constantly, we can't help wondering why IOC have retained the Afrikaans name, instead of changing it to the proposed Piping Cisticola...?

**Zitting Cisticola** *(Cisticola juncidis)*
21/11 1 Palabana Road, Lusaka.
26/11 1 Nampene Floodplains.

**Desert Cisticola** *(Cisticola aridulus)*
21/11 1 Palabana Road, Lusaka.

**Tawny-flanked Prinia** *(Prinia subflava)*
- Not seen in Kasanka NP, but otherwise widespread with a total of 26 birds.

**Yellow-breasted Apalis** *(Apalis flavida)*
21/11 1 Palabana Road, Lusaka.
21/11 1 Moorings Camp.
22/11 1 Lochinvar NP.
23+24/11 2+1 Nkanga RCA.
25/11 2 Livingstone - Machile IBA.
26/11 3 Nampene Island.
3/12 2 Kasanka NP.

</tbody>
</table>

- Another one of those species which is probably easier found in Zambia than anywhere else.

- Increasingly common as we traveled south in Zambia. Abundant in Hwange NP.

- We also saw a few flocks of unidentified glossy starlings passing the bat observation platforms in Kasanka NP, but in general we were surprised by the low numbers of these beauties.

- 42 birds seen. Widely distributed but generally in low numbers. Highest counts were 9 and 22 in Nkanga RCA on 23rd and 24th November.

- Widespread but only seen/heard in low numbers. All in all, 8 birds were recorded in 7 different places.
Grey Tit-Flycatcher (*Myioparus plumbeus*)
24/11 2  Nkanga RCA.

**Southern Black Flycatcher** (*Melaenornis pammelaina*)
21/11 2 Lazy J Ranch, Lusaka.
21/11 1 Moorings Camp.
23+24/11 2+2 Nkanga RCA.
25/11 1 Machile iBA.
27/11 1 Hwange NP.

**Pale Flycatcher** (*Melaenornis pallidus*)
21/11 1 Lazy J Ranch, Lusaka.

**Marico Flycatcher** (*Melaenornis mariquensis*)
25/11 1 Machile IBA.

**Spotted Flycatcher** (*Muscicapa striata*)
- A total of 33 birds were seen throughout, but mainly in southern central Zambia.

**Ashy Flycatcher** (*Muscicapa caerulescens*)
21/11 1 Moorings Camp.
23/11 1 Nkanga RCA.
30/11 1 Victoria Falls.
2/12 1 Kasanka NP.

**Swamp Flycatcher** (*Muscicapa aquatic*)
22/11 2 Lochinvar NP.

**Böhm’s Flycatcher** (*Muscicapa boehmi*)
3/12 1 Kasanka NP.

**White-browed Robin-Chat** (*Cossypha heuglini*)
- A bit skulky but often heard as an early morning singer. In total 20 birds were seen or heard throughout.

**Collared Palm Thrush** (*Cichladusa arquata*)
21/11 1 Palabana Road, Lusaka.

**Collared Flycatcher** (*Ficedula albicollis*)
24/11 2 Nkanga RCA.
4/12 1 Kasanka NP.
African Stonechat (*Saxicola torquatus*)
22/11 1 Lochinvar NP.
23/11 1 Nkanga RCA.
26/11 7 Nampene Floodplains.
3/12 1 Luapula River.
3+4/12 1+1 Kasanka NP.

Sooty Chat (*Myrmecocichla nigra*)
23/11 2 Nkanga RCA.

Arnot’s Chat (*Myrmecocichla arnotii*)
21/11 2 Lazy J Ranch, Lusaka.
23/11 h Nkanga RCA.

Capped Wheatear (*Oenanthe pileata*)
22/11 8 Lochinvar NP.
28/11 4 Hwange NP.

Western Violet-backed Sunbird (*A. longuemarei*)
47/12 1 Kasanka NP.

Collared Sunbird (*Hedydipna collaris*)
21/11 1 Palabana road, Lusaka.
23/11 1 Nkanga RCA.
26/11 2 Nampene Island and Floodplains.
3/12 3 Kasanka NP.

Olive Sunbird (*Cyanomitra olivacea*)
21/11 1 Palbana Road, Lusaka.

Amethyst Sunbird (*Chalcomitra amthystina*)
21/11 1 Lazy J Ranch, Lusaka.
23+24/11 1+1 Nkanga RCA.
2+4/12 1+2 Kasanka NP.

Scarlet-chested Sunbird (*Chalcomitra senegalensis*)
23+24/11 3+1 Nkanga RCA.
28/11 1 Hwange NP.

Western Miombo Sunbird (*Cinnyris gertrudis*)
4/12 1 Kasanka NP.

Marico Sunbird (*Cinnyris mariquensis*)
25/11 6 Machile IBA.
26/11 2+ Nampene Island.

Shelley’s Sunbird (*Cinnyris shelleyi*)
24/11 1 Nkanga RCA.
- It took some effort to find this range restricted species which is probably best found in Zambia.

Purple-banded Sunbird (*Cinnyris bifasciatus*)
23/11 2 Nkanga RCA.
26/11 1 Nampene Floodplains.

White-bellied Sunbird (*Cinnyris talatala*)
24/11 1 Nkanga RCA.
26/11 1 Nampene Floodplains.

Variable Sunbird (*Cinnyris venustus*)
20+21/11 1+1 Palabana Road, Lusaka.
21/11 3 Moorings Camp.

Copper Sunbird (*Cinnyris cupreus*)
21/11 2 Lazy J Ranch, Lusaka.
25/11 2 Machile IBA.
26/11 1 Nampene Island.

Yellow-throated Bush Sparrow (*G. superciliaris*)
21/11 5 Lazy J Ranch, Lusaka.
23/11 5 Nkanga RCA.

Northern Grey-headed Sparrow (*Passer griseus*)
21/11 14 Palabana Road, Lusaka.
21/11 5 Lazy J Ranch, Lusaka.
21/11 15 Lusaka – Moorings Camp.
23/11 6 Moorings Camp – Nkanga RCA.
23/11 13 Nkanga RCA.
28/11 1 Robins Camp, Hwange NP.

Southern Grey-headed Sparrow (*Passer diffusus*)
20/11 2 Palabana Road, Lusaka.
22/11 10 Lochinvar NP.
25/11 11 Livingston – Machile IBA.
26/11 1 Nampene Floodplains.
27-30/11 25+8+14+9 Hwange NP.

Red-billed Buffalo Weaver (*Bubalornis niger*)
25/11 120 Livingston – Machile IBA.
27-29/11 40+45+18 Hwange NP.

White-browed Sparrow-Weaver (*Plocepasser mahali*)
- Abundant and widespread in the South.

Scaly-feathered Weaver (*Sporopipes squamifrons*)
25/11 8 Machile IBA.
- Sitting together in a half-finished nest.

Thick-billed Weaver (*Amblyospiza albifrons*)
25+26/11 1+7 Nampene Island and Floodplains.
- Seen really well collecting nesting materials in the reeds just next to the sun deck of the restaurant on Nampene Island.

Spectacled Weaver (*Ploceus ocularis*)
21/11 2 Palabana Road, Lusaka.
23/11 1 Nkanga RCA.
26/11 2 Nampene Island and Floodplains.
3+4/12 2+6 Kasanka NP.
Holub’s Golden Weaver (*Ploceus xanthops*)
20+21/11 4+2 Palabana Road, Lusaka.
26/11 3 Nampene Island and Floodplains, 4/12 2 Kasanka NP.

Southern Brown-throated Weaver (*P. xanthopterus*)
25+26/11 5+9 Nampene Island and Floodplains.

Southern Masked Weaver (*Ploceus velatus*)
- Common and widespread in south central Zambia with a total of 45 birds.

Katanga Masked Weaver (*Ploceus katangae*)
3/12 12 Luapula River.
- Another one of those range restricted species. This one is only found in Northeastern Zambia and just across the border in the DRC.

Village Weaver (*Ploceus cucullatus*)
20/11 9 Palabana Road, Lusaka.
23/11 2+ Nkanga RCA.
25+26/11 6+5 Nampene Island.

Dark-backed Weaver (*Ploceus bicolor*)
3+4/12 2+5 Kasanka NP.
- The later joining a mixed species flock in the riverine forest at Pontoon.

Red-headed Weaver (*Anaplectes rubriceps*)
23/11 2 Nkanga RCA.
28/11 2 Hwange NP.

Red-billed Quelea (*Quelea quelea*)
- Very common throughout, though none were seen in Kasanka NP.

Yellow-crowned Bishop (*Euplectes afer*)
22/11 2 Lochinvar NP.

Southern Red Bishop (*Euplectes orix*)
22/11 10+ Lochinvar NP.
23/11 30 Nkanga RCA.

Yellow Bishop (*Euplectes capensis*)
20/11 14 Palabana Road, Lusaka.
21/11 2 Lazy J Ranch, Lusaka.

21/11 3 Moorings Camp.
23/11 7 Nkanga RCA.
24/11 1 Livingstone.
1/12 3 Lusaka – Nkanga RCA.

Fan-tailed Widowbird (*Euplectes axillaris*)
22/11 60 Lochinvar NP.
26/11 45 Nampene Floodplains.
2/12 25 Kasanka NP.
3/12 27 Luapula River.
Yellow-mantled Widowbird (*Euplectes macroura*)
20/11  8  Palabana Road, Lusaka.
2+4/12  2+6  Kasanka NP.

White-winged Widowbird (*Euplectes albonotatus*)
20/11  1  Palabana Road, Lusaka.

Long-tailed Widowbird (*Euplectes progne*)
3/12  13  Luapula River.
- Easily found along the main road immediately south of the bridge. Some beautiful breeding plumage males, sitting right next to the road, were seen very well here.

Bronze Mannikin (*Spermestes cucullata*)
20/11  2  Palabana Road, Lusaka.
21/11  20  Moorings Camp.
23+24/11  5+5  Nkanga RCA.
24/11  9  Livingstone.
25/11  7  Livingstone – Machile IBA.

Red-backed Mannikin (*Spermestes nigriceps*)
21/11  10  Palabana Road, Lusaka.
- Obviously breeding since they were collecting nesting material along the small stream.

Fawn-breasted Waxbill (*Estrilda paludicola*)
4/12  7  Wasa Lodge, Kasanka NP.

Black-faced Waxbill (*Brunhilda erythronotos*)
25/11  1  Machile IBA.

Common Waxbill (*Estrilda astrild*)
20+21/11  3+35  Palabana Road, Lusaka.
23/11  5  Nkanga RCA.
26/11  2  Nampene Floodplains.

Quailfinch (*Ortygospiza atricollis*)
22/11  1  Lochinvar NP.
23/11  2  Nkanga RCA.

Cut-throat Finch (*Ortygospiza atricollis*)
25/11  6  Machile IBA.

Violet-eared Waxbill (*Granatina granatinus*)
25/11  1  Machile IBA.

Blue Waxbill (*Uraeginthus angolensis*)
- Not seen in Kasanka NP but otherwise very common and widespread.

Green-winged Pytilia (*Pytilia melba*)
20+21/11  1+1  Palabana Road, Lusaka.
21/11  2  Moorings Camp.

22/11  1  Lochinvar NP.
24/11  5  Livingstone.
26/11  2  Nampene Floodplains.
29/11  1  Hwange NP.

Orange-winged Pytilia (*Pytilia afra*)
4/12  1  Kasanka NP.

Red-throated Twinspot (*Hypargos niveoguttatus*)
21/11  1  Palabana Road, Lusaka.
21+22/11  2+2  Moorings Camp.
23/11  2  Nkanga RCA.
2+4/12  1+2  Kasanka NP.

Red-billed Firefinch (*Lagonosticta senegala*)
23/11  2  Nkanga RCA.
25/11  9  Livingstone – Machile IBA.
25+26/11  4+2  Nampene Island and Floodplains.

Jameson’s Firefinch (*Lagonosticta rhodopareia*)
21/11  4  Palabana Road, Lusaka.
21/11  2  Moorings Camp.
22/11  2  Lochinvar NP.
27+29/11  2+2  Hwange NP.
30/11  2  Victoria Falls.

Brown Firefinch (*Lagonosticta nitidua*)
25+26/11  7+8  Nampene Island and Floodplains.

Village Indigobird (*Vidua chalybeata*)
22/11  2  Lochinvar NP.
25/11  12  Machile IBA.

Pin-tailed Whydah (*Vidua macroura*)
- Widespread and a joy to behold with most of the males in full breeding plumage. A total of 23 birds were seen.

Shaft-tailed Whydah (*Vidua regia*)
25/11  4  Machile IBA.
27-30/11  2+2+34+1  Hwange NP.
- Surprisingly numerous in Hwange NP. Most males were coming into their lovely breeding plumage.

Long-tailed Paradise Whydah (*Vidua paradisaea*)
21/11  6  Moorings Camp.
24/11  2  Livingstone.
25/11  30  Machile IBA.
27/11  1  Hwange NP.
- Most males were in transitional plumages.

Western Yellow Wagtail (*Motacilla flava*)
22/11  60  Lochinvar NP.
1/12  1  Kasanka NP.
Cape Wagtail (*Motacilla capensis*)
22/11 1 Lochinvar NP.
26/11 4 Nampene Island and Floodplains.

African Pied Wagtail (*Motacilla aguimp*)
- Only seen in Lusaka and further south, with a total of 20 birds.

Rosy-throated Longclaw – Nampene Floodplains.

Fülleborn's Longclaw (*Macronyx fuelleborni*)
23+24/11 2+1 Nkanga NP.
3/12 1 Kasanka NP.
- Although this species has a fairly large breeding range, much of it is in Angola and the DRC, which means that Zambia is probably the easiest place to find it.

Rosy-throated Longclaw (*Macronyx ameliae*)
26/11 2 Nampene Floodplains.
- Another lovely longclaw seen very well indeed.

African Pipit (*Anthus cinnamomeus*)
22/11 70 Lochinvar NP.
23+24/11 1+4 Nkanga RCA.

Wood Pipit (*Anthus nyassae*)
21/11 8 Lazy J Ranch, Lusaka.
23+24/11 1+1 Nkanga RCA.

Buffy Pipit (*Anthus vaalensis*)
22/11 2 Lochinvar NP.

Plain-backed Pipit (*Anthus leucophrys*)
23/11 2 Nkanga RCA.
26/11 1 Nampene Floodplains.
Tree Pipit (*Anthus trivialis*)
21/11 7 Lazy J Ranch, Lusaka.
23/11 2 Nkanga RCA.

Yellow-fronted Canary (*Crithagra mozambica*)
21/11 2 Palabana Road, Lusaka.
21/11 4 Lazy J Ranch, Lusaka.
23+24/11 1+1 Nkanga RCA.
24/11 1 Livingstone.

Brimstone Canary (*Crithagra sulphurata*)
20+21/11 2+4 Palabana Road, Lusaka.

Black-eared Seedeater (*Crithagra mennelli*)
21/11 1 Lazy J Ranch, Lusaka.
23/11 2 Nkanga RCA.

Golden-breasted Bunting (*Emberiza flaviventris*)
21/11 1 Moorings Camp.
23/11 1 Nkanga RCA.
24/11 1 Livingstone.
26+27/11 1+3 Hwange NP.

Cinnamon-breasted Bunting (*Emberiza tahapisi*)
22/11 2 Moorings Camp – Lochinvar NP.
25/11 1 Livingstone - Machile IBA.
26/11 5 Hwange NP.
2/12 1 Kasanka NP.

Cabanis’s Bunting (*Emberiza cabanisi*)
21/11 1 Lazy J Ranch, Lusaka.

</tbody>
</table>
Hippopotamus (*Hippopotamus amphibius*)
24/11 5 Zambezi River, Livingstone.
25/11 5 Nampene Island.
26-29/11 11+20+49+15 Hwange NP.
1-4/12 h+4+15+10 Kasanka NP.

Giraffe (*Giraffa camelopardalis*)
27-29/11 13+11+2 Hwange NP.

Impala (*Aepyceros melampus*)
22/11 13 Lochinvar NP.
26-30/11 32+110+130+80+35 Hwange NP.

Oribi (*Ourebia ourebi*)
22/11 6 Lochinvar NP.

Steenbok (*Raphicerus campestris*)
21/11 1 Lazy J Ranch, Lusaka.
24/11 6 Livingston.
26-29/11 1+1+2+11 Hwange NP.
1+2+4/12 1+2+1 Kasanka NP.

African Buffalo (*Syncerus caffer*)
2/12 40 Kasanka NP.

Sitatunga (*Tragelaphus speki*)
1+2+4/12 10+1+10 Kasanka NP.
- It was wonderful to see this lovely species, which can be difficult to see elsewhere, so well.

Bushbuck (*Tragelaphus scriptus*)
30/11 5 Victoria Falls.
1+2/12 1+3 Kasanka NP.

Greater Kudu (*Tragelaphus strepsiceros*)
26-30/11 1+3+10+11+7 Hwange NP.
- Including several impressive males - simply lovely!

Common Duiker (*Sylvicapra grimmia*)
22/11 3 Lochinvar NP.
23/11 1 Nkanga RCA.
2+3/12 1+1 Kasanka NP.

Roan Antelope (*Hippotragus equinus*)
27-29/11 31+2+29 Hwange NP.

Waterbuck (*Kobus ellipsiprymnus*)
26-28/11 8+6+6 Hwange NP.

Southern Lechwe (*Kobus leche*)
22/11 400 (kafuensis) Lochinvar NP.
3/12 350+ (smithemani) Luapula River.
- This could well be a split just waiting to happen.

Puku (*Kobus vardoni*)
1-4/12 80+80+350+150 Kasanka NP.

Southern Reedbuck (*Redunca arundinum*)
27-29/11 11+18+30 Hwange NP.

- It was wonderful to see this lovely species, which can be difficult to see elsewhere, so well.

Straw-coloured Fruit Bats - Kasanka National Park.
