

ER 189 Birds in Finland

I made this birdwatching holiday to Finland with my wife Inka. During 3 weeks we stayed overnight at 15 different places. Our roadtrip to Finland was from Helsinki to the Norwegian border and back, almost 4000 km by hired car. We had practically no problems with insects like mosquitos or mitches. Unfortunately the wheater was cool, cloudy most of the time and sometimes rainy periods occurred. In the south the weather was better, especially in Lahti and Helsinki, where warm and dry conditions prevailed. Most of Finland is forested (70%), the rest consists of water and agricultural fields. The country is known for its many lakes, as much as 168.000.

Short description of the visited areas :

Kotka : harbour town at Finlands southcoast. Some birds were observed during our short stay.
 Valkmusa NP : small NP northwest of Kotka. One can make a roundwalk visiting an observation tower.
 Imatra : a short forest walk was made to a nearby lake.
 Parikkala area : village best known because of the nearby wetland reserve of Siikalahti, a former lake from which the waterlevel was lowered to claim agricultural land. This wetland was visited twice. A hike was made in the surroundings of the village.
 Koli NP area : beautiful mountainous area with good views from rocky outcrops over the surrounding forests and lakes. We stayed overnight in the small touristic village.
 Nurmes area : some birds were seen along the road in the surroundings of this town.
 Tiilikajärvi NP area : 34 km² NP consisting of marshes and wild woodlands. There is a nice roundwalk starting at the carpark. During our visit it was raining most of the time.
 Suomussalmi area : small town with a nice lakeside park. The nearby winter war monument Raatteen Portti was visited, as well as the observation towers of Hirvasjärvi and Kylmäjärvi, all in rainy conditions.
 Hossa NP : nice NP 50 kms north of Suomussalmi. This forested and hilly area has many trails, lakes, camping facilities and a good restaurant. We did some hikes and camped 1 night.
 Kuusamo area : small town, our base to explore the surrounding area. We stayed 4 nights at campsite Matkajoki, north of town. Nearby are some nice wetlands.
 Riisitunturi NP : we made a day visit to this area northwest of Kuusamo. The lower parts are dominated by open and old spruce forest. The highest peak is 465 m, well above the tree-limit and allows good views over the surrounding area, to Ruka and beyond into Russia. The NP has a big parking area and a popular circular walk.
 Ruka area : ski resort at the foot of a few hills. East of the village is a protected nature reserve, part of the Oulanka NP. Here one can make a nice walk into the forest to Valtaavara peak (487 m). Further north is Konttainen peak (433 m). This rocky hill has good views, it is possible to make a nice circular walk from a short parkingstrip along the access road north of Ruka.
 Oulanka NP : we made a day visit to this beautiful NP northeast of Ruka. A roundwalk was made from the visitor's centre. The area is known because of its famous and spectacular rapids along the Oulanka river. Near Juuma a short walk was made over a hanging bridge.
 Ruka -> Kemijärvi : some birds were seen from the main road between Ruka and Kemijärvi, especially in the big lakes just before arriving in the latter village.
 Pyhä - Luosto NP : we visited the Pyhä section of this NP and hiked to the Tunturiaapa watch tower. The area has rocky mountains, pine forests and extensive bogs and lakes.
 Petkula : we camped along the dammed river next to this tiny and extended village. The dam was visited and some birds were seen in the surroundings of the campsite.
 Urho - Kekkonen NP : a short hike was made in a section of this NP, next tot the main road. Unfortunately a rainy period occurred during our visit, and very little birds were seen.
 Ivalo area : We camped two nights southwest of the village, next to Ivalojoki. During the day we stayed in the area and explored the road in the direction of Murmansk and northeast of town. Some birds were seen in the surroundings of the village, especially near the campsite.
 Inari : we birded the city park along the shore of the vast Inarijärvi, under rainy conditions. The famous rapids north of the village were visited twice.
 Kaamanen area : the area southwest of Kaamanen was explored. Here is a nice watch tower overlooking the lakes in this beautiful area. We stayed two nights at Neljän Tuulen Tupa, a hotel and campsite along the main road to Norway, north of the village. One can see many birds here (and squirrels), visiting the bird feeders in the garden.
 Utsjoki area : northernmost Finnish village. The border with Norway is a bridge over the Tana-Deatnu-Teno river. A short hike was made in the area, and some spots along the main road were visited.
 Lemmenjoki area NP : big NP southwest of Inari, which we visited on our way back south. The area along the river-valley Lemmenjoki has some good stands of old growth pine forest which are covered in thick layers of lichens. A nice roundwalk was made.
 Pokka area : some birds were seen from the gravel road passing this village.
 Kittilä : We camped one night along the Ounasjoki. During our stay the weather was cloudy and rainy. Consequently only few birds were seen.
 Rovaniemi : provincial town known because of its ubication at the polar circle. Several big rivers flow here together. We overlooked the wide waters of the rivers and visited a city park.
 Botnean Bay : Some spots along the coast between Kemi and Il were visited. We spent the night in Il.
 Oulu area : a short visit was paid to the Lintulampi park south of the centre. Southwest of town is the Liminganlathu bay, a nature reserve part of the Natura 2000 network. Here one can visit several observation towers overlooking the wetlands.
 Kärsämääki area : some birds were observed along the road around of this town.
 Salamajärvi NP area : We camped in the northern part of the area, at Pikku Peura. Next day two circular hikes were made around the visitor's centre of Koraisalmi.

Viitasaari area : I birded the area around the campground southwest of town.

Pyhä - Häkki NP : a roundwalk was made in this old pine-forest, accessible from a parking along the main road.

Jyväskylä -> Lusi : some birds were seen in the fields bordering the road.

Lahti area : considerable town of 100.000 inhabitants. We camped in Sipura east of the centre and visited the lakeshore in Kahvisaari.

Helsinki area : Finnish capital and biggest town, with 1,5 million inhabitants in the metropolitan area. We stayed in the northern suburb Vantaa. The Vanhankaupunginkoski Natura Reserve east of the centre was visited twice. Here several nice observation towers overlooking the wetlands can be visited.

List of mammals :

- Red Fox, *Vulpes vulpes* : 1 ex, Vanhankaupunginkoski Natura Reserve, Helsinki
- American Mink, *Mustela vison* : 6 ex, Rukajärvi
- Roe deer, *Capreolus capreolus* : 1 ex, Kotka area
- Reindeer, *Rangifer tarandus* : 187 ex
 - 1 ex, Hossa NP area
 - 25 (8), Kuusamo area
 - 8 ex, Riisitunturi NP
 - 70 ex (25), Ruka area
 - 10 ex, Oulanka NP
 - 10 ex, Ruka -> Kemijärvi
 - 10 ex, Pyhä - Lusto NP
 - 4 ex, Petjula
 - 9 ex, Urho - Kekkonen NP
 - 13 ex (5), Ivalo area
 - 13 ex (5), Kaamanen area
 - 1 ex, Utsjoki area
 - 5 ex, Lemmenjoki area
 - 8 ex, Pokka area
- European Hare, *Lepus europaeus* : 6 ex
 - 1 ex, Kotka area
 - 4 ex, Kajaani
 - 1 ex, Tiilikajärvi NP
- Mountain Hare, *Lepus timidus* : 18 ex
 - 8 (5), Kuusamo area
 - 2 ex, Ruka area
 - 6 ex (3), Ivalo area
 - 1 ex, Pokka area
 - 1 ex, Vitaasari
- Rabbit, *Oryctolagus cuniculus* : 2 ex, Helsinki, escape
- Red squirrel, *Sciurus vulgaris* : 27 ex
 - 1 ex, Kotka area
 - 2 ex, Parikkala area
 - 1 ex, Hossa NP
 - 9 ex (6), Kuusamo area
 - 5 ex (2), Kaamanen area
 - 1 ex, Kittilä
 - 2 ex, Rovaniemi
 - 2 ex, Oulu area
 - 2 ex, Salamajärvi NP
 - 1 ex, Vitaasari
 - 1 ex, Helsinki
- Muskrat, *Ondatra zibethicus* : 2 ex (1), Kuusamo area

Number of species : 146
